Exploring the Martian Moons Manfred "Dutch" von Ehrenfried, 2017-04-11 This book explores the once popular idea of Flexible Path in terms of Mars a strategy that would focus on a manned orbital mission to Mars's moons rather than the more risky expensive and time consuming trip to land humans on the Martian surface While currently still not the most popular idea this mission would take advantage of the operational scientific and engineering lessons to be learned from going to Mars's moons first Unlike a trip to the planet's surface an orbital mission avoids the dangers of the deep gravity well of Mars and a very long stay on the surface This is analogous to Apollo 8 and 10 which preceded the landing on the Moon of Apollo 11 Furthermore a Mars orbital mission could be achieved at least five years possibly 10 before a landing mission Nor would an orbital mission require all of the extra vehicles equipment and supplies needed for a landing and a stay on the planet for over a year The cost difference between the two types of missions is in the order of tens of billions of dollars An orbital mission to Deimos and Phobos would provide an early opportunity to acquire scientific knowledge of the moons and Mars as well since some of the regolith is presumed to be soil ejected from Mars It may also offer the opportunity to deploy scientific instruments on the moons which would aid subsequent missions It would provide early operational experience in the Mars environment without the risk of a landing The author convincingly argues this experience would enhance the probability of a

safe and successful Mars landing by NASA at a later date and lays out the best way to approach an orbital mission in great detail Combining path breaking science with achievable goals on a fast timetable this approach is the best of both worlds and our best path to reaching Mars safely in the future □□□□□□□□□□ Hong Kong,2012-02-28 **A Review of NASA's Exploration Program in Transition** United States. COVID 19 pandemic educators are forced to consider new evaluation forms because social distancing regulations have made traditional in presence examinations less viable This paper proposes that one such form the LN examination is superior to the previously researched CB OB and CS examination forms in terms of higher performance and retention as well as lower test anxiety Students may perform better on an LN exam for a variety of reasons This includes the likely increase in time spent studying and reviewing before an exam due to the requirements and parameters of preparing LN A decrease in time spent searching through LN compared to OB during the exam should also provide superior performance Furthermore with the implementation of LN examiners will be freer to generate more practical questions that test students understanding and application abilities rather than rely on multiple choice and rote learning An increase in performance in such exams with LN is expected compared to CB This performance increase will likely only grow over time as students become familiar with studying for such reasoning and application based questions typical to an LN exam Performance would further be increased due to the anticipated lowering of anxiety on such an examination type Anxiety could conceivably be lower in the LN condition because students have access to all of the necessary material without needing to spend as much time and energy searching for the relevant information in their notes Also they may be comforted by the knowledge that they have much of the relevant material close at hand further decreasing anxiety Finally long term retention of the material could also be anticipated because the production of comprehensive LN likely increases memory coding of the material as well as decreasing dependency The following study proposal suggests a comprehensive approach to test how the length of authorized notes affects middle school students performance retention and anxiety in a social studies exam Professional Memoirs, Corps of Engineers, United States Army and Engineer Department at Large ,2004 **AJN Career Guide for ...** ,2006
