Alluvial Gold Mining Techniques Of 1850:

Water in North American Environmental History Martin V. Melosi, 2022-06-07 Water in North American Environmental History offers 25 case studies that explore the range of uses and perceptions of water throughout Canadian, Mexican, and United States history. Water has served a myriad of purposes historically: human sustenance, agricultural irrigation, sanitation, fire protection, military defense, power generation, transportation, and much more. Water and its uses provide an excellent entry into the study of humans and the environment, not only because water is a vital resource for life, but also because water as a medium is so intimately woven into the everyday experiences of humans and into society's economic, political, and social fabric. A North American perspective is not representative of the world's water use, but it is an area with a linked history and many overlapping human and environmental features and concerns. With a continental perspective, the book explores many disparate topics without being confined to the history and experiences of just one country. The chapters are short but descriptive and departure points for what they tell us about the human experience in dealing with water and the environmental implications of water use. The text leads students to consider water in relation to society and to the past. The book will be of interest to students of environmental history, geography, and the environmental sciences.

Nonfuel Mineral Resources of the Public Lands, 1970 *Money Pits: British Mining Companies in the Californian and Australian Gold Rushes of the 1850s* John Woodland, 2016-04-15 Between 1849 and 1853, shares in nearly 120 public companies to exploit the booming goldfields of California and Australia were offered to the British public. The companies were collectively capitalised at over 15 million, but in the end, only some 1.75 million was actually raised. Between 42 of them, with only one company surviving, what the newspapers of the day described as a gold bubble. This book provides an overview of the entire bubble event, its antecedents, and its outcomes. A number of researchers have investigated an earlier boom in the mid 1820s to reopen gold and silver mines in Latin America, and several have studied individual company operations of that period. This is the first detailed investigation of the British gold bubble companies of the 1850s and their involvement in the almost simultaneous gold rushes on both sides of the Pacific Ocean.

Ditches of Nevada City Dom Lindars,2023-04-07 This book tells the history of Nevada City California through the eyes of the men that built it For its first 100 years everything in Nevada City revolved around gold But this is not another book about finding gold To get gold you needed water to pan for it to wash it in a sluice to blast away a hillside with an immense water cannon or to turn the water wheel of a quartz ore stamp mill This book instead asks How did they get the water It reveals the engineering marvels that brought water to Nevada City s dry hills from tens of miles away But what if all the water in every ravine creek and valley around Nevada City was controlled by just three men Well for three decades every miner farmer or business could only buy water from the powerful South Yuba Canal Company What would happen if you got into an argument with them Or couldn t afford to pay their water bill Or even dared to compete with them The book traces the ingenuity and hard work of the town s miners and ditch builders highlighting in detail the history and origins of various local neighborhoods including Nevada City itself Hirschman s Pond Sugar Loaf Mountain Deer Creek Scotts Flat Manzanita Diggings Gold Flat and various mining camps along Washington Ridge This vivid portrayal follows the area s evolution from the chaos of thousands of miners scratching out a living in clusters of muddy tents to a genteel town with hotels stores banks theaters and libraries What began as a search to uncover a sprawling network of old ditches turned into a collection of never before told stories of the gold miners the ruthless and greedy ditch company and the rivals that it crushed The domineering ditch company later enabled the next generation of monopoly to provide electrical power The story of PG E also started in Nevada City This in turn led to the now more forward looking stewardship of the Nevada Irrigation District The unique format of this book blends beautiful archival images with more than 35 in depth biographies of key figures in Nevada City This 884 page hardcover book includes over 600 photos and illustrations including 200 historic photographs and 75 hand crafted maps based on modern lidar technology that reveal the locations of the old mining ditches flumes mines and tunnels
