William Frank Hughes, John A. Brighton, 1991 This book may be used as either a text or supplementary text for a first undergraduate course in fluid mechanics. However, one of the unique features is the treatment of a broad spectrum of fluid mechanics topics and a few specialized topics such as hypersonic flow, magnetohydrodynamics and non-Newtonian fluids. Dynamics for Beginners John Bascombe Lock, 1887 **Dutton's Orthopaedic Examination Evaluation and Intervention, Third Edition** Mark Dutton, 2012-07-02

A complete evidence based textbook and reference for physical therapy students and practitioners. *Dutton's Orthopaedic Examination Evaluation and Intervention* provides you with a systematic logical approach to the evaluation and intervention of the orthopedic patient. Comprehensive and up to date, *Dutton's* strikes the perfect balance in its coverage of examination and treatment. For any intervention to be successful, an accurate diagnosis must be followed by a carefully planned and specific rehabilitation program to both the affected area and its related structure. This approach must take into consideration the structure involved and the stage of healing. *Dutton's Orthopaedic Examination Evaluation and Intervention* emphasizes the appropriate use of manual techniques and therapeutic exercise based on these considerations. The correct applications of electrotherapeutic and thermal modalities are outlined throughout as adjuncts to the rehabilitative process. The content reflects the consistent unified voice of a single author, a prominent practicing therapist who delivers step by step guidance on the examination of each joint and region. This in depth coverage leads you logically through systems review and differential diagnosis, aided by decision making algorithms. Features: NEW full color illustrations of anatomy and treatment and evaluation procedures. Review Q & A for each chapter. Companion DVD includes 500 illustrative video clips. Chapters updated to reflect the latest research and treatment techniques.

1910 *Assumptions Inhibiting Progress in Comparative Biology* Brian I. Crother, Lynne R. Parenti, 2016-11-18 This book is a thought provoking assessment of assumptions inhibiting progress in comparative biology. The volume is inspired by a list generated years earlier by Donn Rosen, one of the most influential, innovative and productive comparative biologists of the latter 20th century. His list has assumed almost legendary status among comparative evolutionary biologists. Surprisingly, many of the obstructing assumptions implicated by Rosen remain relevant today. Any comparative biologist hoping to avoid such assumptions in their own research will benefit from this introspective volume.
