

Methodological Interests

- Criticism of rhetorical artifacts
 - In 1968, Edwin Black questioned the fundamental sufficiency of neo-classical rhetorical criticism
 - By 1985, rhetorical criticism ceased to be a methodology and emerged as a collection of methods
 - Burke-based criticism—clusters, pentad, representative anecdote
 - Fantasy theme
 - Feminist
 - Generative

Interests Of Criticism

Mike Jess

Interests Of Criticism:

The Interests of Criticism Hazard Adams, 1969 *The Issue in Literary Criticism* Myron Franklin Brightfield, 1968 This book aims to give organic and systematic expression to the working principles of literary criticism Preface **Reputation and Judicial Tactics** Shai Dothan, 2015 This book argues that national and international courts seek to enhance their reputations through the strategic exercise of judicial power Courts often cannot enforce their judgments and must rely on reputational sanctions to ensure compliance One way to do this is for courts to improve their reputation for generating compliance with their judgments When the court's reputation is increased parties will be expected to comply with its judgments and the reputational sanction on a party that fails to comply will be higher This strategy allows national and international courts which cannot enforce their judgments against states and executives to improve the likelihood that their judgments will be complied with over time This book describes the judicial tactics that courts use to shape their judgments in ways that maximize their reputational gains The University Magazine and Free Review, 1897 **Privacy and Data Protection Issues of Biometric Applications** Els J. Kindt, 2013-12-05 This book discusses all critical privacy and data protection aspects of biometric systems from a legal perspective It contains a systematic and complete analysis of the many issues raised by these systems based on examples worldwide and provides several recommendations for a transnational regulatory framework An appropriate legal framework is in most countries not yet in place Biometric systems use facial images fingerprints iris and or voice in an automated way to identify or to verify identity claims of persons The treatise which has an interdisciplinary approach starts with explaining the functioning of biometric systems in general terms for non specialists It continues with a description of the legal nature of biometric data and makes a comparison with DNA and biological material and the regulation thereof After describing the risks the work further reviews the opinions of data protection authorities in relation to biometric systems and current and future EU law A detailed legal comparative analysis is made of the situation in Belgium France and the Netherlands The author concludes with an evaluation of the proportionality principle and the application of data protection law to biometric data processing operations mainly in the private sector Pleading for more safeguards in legislation the author makes several suggestions for a regulatory framework aiming at reducing the risks of biometric systems They include limitations to the collection and storage of biometric data as well as technical measures which could influence the proportionality of the processing The text is supported by several figures and tables providing a summary of particular points of the discussion The book also uses the 2012 biometric vocabulary adopted by ISO and contains an extensive bibliography and literature sources John Ruskin, considered as an art critic Mrs Richard R. Armstrong, 1889 *How to Interest the Laity in Missions* George Clifford Thomas, 1898 Homiletic Review, 1893 The Quarterly Review, 1888 **Chinese Democracy after Tiananmen** Yijiang Ding, 2011-11-01 In 1989 most observers believed that China's political reform process had been violently short circuited but few would now dispute that

China is in a very important transition Central to this transition has been an extraordinary change in the formal intellectual conception of democracy In this book Yijiang Ding presents a multi dimensional picture of China at the political crossroads Chinese Democracy looks at the significant change in the state society relationship in contemporary China in three interrelated areas intellectual social and cultural Drawing heavily on recent Chinese scholarship Ding shows that the emergent theory on the dualism of state and society is contemporaneous with a new cognitive and cultural appreciation of the people s independence from state authority Is China moving toward liberal democracy Does Western engagement with China contribute economically and politically to this shift These are the questions at the heart of the book Which are especially timely given the recent reconstruction of political regimes worldwide **Literary Criticism** C. D.

Narasimhaiah,1966 Work Time Evan Watkins,1992-03-01 This book shares with a number of recent studies an interest in the historical development of English in the United States in how it became a central discipline in the humanities and in what the ideological affiliations of literature and literary study might be It is strikingly original however in that instead of focusing on the subject matter of English e g the canon or critical positions as most recent studies it examines precisely how work time is spent within English departments as well as what circulates through them and to where For in terms of immediate social authority such activities as writing letters of recommendation are more directly relevant than critical methodology The author concludes by locating cultural work in English between such massively capitalized sites of cultural production as television and advertising and popular cultures meaning what people do every day with whatever is cheaply available to them English is like the former in that it requires highly developed socially certified skills and knowledges Like popular cultures however work in English is carried out with readily available material means By recognizing this actual situation he argues one can view English as not just passively reproducing the existing system of social values but as working within popular culture to provide the possibility of meaningful political opposition **Saudi Arabia and Israel** GEW Intelligence

Unit,2024-05-02 In an era where geopolitics dictates the course of international relations the evolving dynamics between Saudi Arabia and Israel emerge as a fascinating study of diplomacy strategic alliances and the quest for stability in the Middle East From an outward posture of distance and contention the undercurrents of their interaction suggest a gradual shift towards a more nuanced engagement This article delves into the multifaceted relationship between these two pivotal states exploring their historical background current engagements and the covert cooperation that often eludes the public eye Historical Context The Foundations of a Complex Relationship The relationship between Saudi Arabia and Israel is steeped in the history of the Middle East a region characterized by its rich cultural heritage and complex geopolitical landscape Historically the emergence of Israel in 1948 marked the beginning of overt tensions with its Arab neighbors including Saudi Arabia These tensions were primarily rooted in the broader Arab Israeli conflict and the struggle for Palestinian statehood a cause that Saudi Arabia has historically supported However beneath the surface of this adversarial stance there have been

periods where mutual interests have paved the way for covert cooperation These instances were driven by shared concerns over regional threats particularly the influence of revolutionary Iran post 1979 Such shared threats have at times necessitated a reevaluation of their mutual stance leading to discreet engagements that have shaped the trajectory of their relationship

Evolving Dynamics in the 21st Century In recent years the geopolitical landscape of the Middle East has undergone significant transformations prompting a reassessment of relationships within the region The rise of Iranian influence concerns over terrorism and the changing priorities of global powers have created new imperatives for Saudi Arabia and Israel These developments have catalyzed a shift moving their relationship from one of cautious distance to incidental alignments
