Government Accountability Office, 2005 Is International Law International? Anthea Roberts, 2017 This book challenges the idea that international law looks the same from anywhere in the world Instead how international lawyers understand and approach their field is often deeply influenced by the national contexts in which they lived studied and worked International law in the United States and in the United Kingdom looks different compared to international law in China and Russia though some approaches particularly Western Anglo American ones are more influential outside their borders than others Given shifts in geopolitical power and the rise of non Western powers like China it is increasingly important for international lawyers to understand how others coming from diverse backgrounds approach the field By examining the international law academics and textbooks of the five permanent members of the UN Security Council Roberts provides a window into these different communities of international lawyers and she uncovers some of the similarities and differences in how they understand and approach international law **Capturing Finance** Carolyn Hardin, 2021-07-09 Arbitrage the trading practice that involves buying assets in one market at a cheap price and immediately selling them in another market for a profit is fundamental to the practice of financial trading and economic understandings of how financial markets function Because traders complete transactions quickly and use other people s money arbitrage is considered to be riskless Yet despite the rhetoric of riskless trading the arbitrage in mortgage backed securities led to the 2008 financial crisis In *Capturing Finance* Carolyn Hardin offers a new way of understanding arbitrage as a means for capturing value in financial capitalism She shows how arbitrage relies on a system of abstract domination built around risk The commonsense beliefs that taking on debt is necessary for affording everyday life and that investing is necessary to secure retirement income compel individuals to assume risk while financial institutions amass profits Hardin insists that mitigating financial capitalism s worst consequences such as perpetuating class and racial inequities requires challenging the narratives that naturalize risk as a necessary element of financial capitalism as well as social life writ large **Symposium** , 2008 **What Explains Differences in International Performance?
