**Karl Pearson** Theodore M. Porter,2010-01-02 Karl Pearson founder of modern statistics came to this field by way of passionate early studies of philosophy and cultural history as well as ether physics and graphical geometry His faith in science grew out of a deeply moral quest reflected also in his socialism and his efforts to find a new basis for relations between men and women This biography recounts Pearson's extraordinary intellectual adventure and sheds new light on the inner life of science Theodore Porter's intensely personal portrait of Pearson extends from religious crisis and sexual tensions to metaphysical and even mathematical anxieties Pearson sought to reconcile reason with enthusiasm and to achieve the impersonal perspective of science without sacrificing complex individuality Even as he longed to experience nature directly and intimately he identified science with renunciation and positivistic detachment Porter finds a turning point in Pearson's career where his humanistic interests gave way to statistical ones in his Grammar of Science 1892 in which he attempted to establish scientific method as the moral educational basis for a refashioned culture In this original and engaging book a leading historian of modern science investigates the interior experience of one man's scientific life while placing it in a rich tapestry of social political and intellectual movements

**Teaching Statistics** Andrew Gelman,Deborah Nolan,2002-08-08 Students in the sciences economics psychology social sciences and medicine take introductory statistics Statistics is increasingly offered at the high school level as well However statistics can be notoriously difficult to teach as it is seen by many students as difficult and boring if not irrelevant to their subject of choice To help dispel these misconceptions Gelman and Nolan have put together this fascinating and thought provoking book Based on years of teaching experience the

book provides a wealth of demonstrations examples and projects that involve active student participation Part I of the book presents a large selection of activities for introductory statistics courses and combines chapters such as First week of class with exercises to break the ice and get students talking then Descriptive statistics collecting and displaying data then follows the traditional topics linear regression data collection probability and inference Part II gives tips on what does and what doesn't work in class how to set up effective demonstrations and examples how to encourage students to participate in class and work effectively in group projects A sample course plan is provided Part III presents material for more advanced courses on topics such as decision theory Bayesian statistics and sampling
