 well beyond that of humans representing the interests of others not just other humans Yet traditional jurisprudence is limited
 in scope for holding these systems legally accountable if they were to malfunction and cause harm Interestingly within the
 judicial system itself the use of AIS is more prevalent now including within the criminal justice system in some jurisdictions
 In the United States for instance AIS algorithms are utilized to determine sentencing and bail processing Still jurists find
 themselves limited to traditional legal methodologies and tools when tackling novel situations brought about by these
 systems For example traditional strict liability concept as applied in tort law typically ties responsibility to the person s e g
