

Each system includes J-SAC modules as required to support the security and access control systems implemented.

### **SOU programming**

No special project programming is required to enable multiple site security and access control systems. When running the RPS4 tool, each site receives 100% of the resources for that site.

Note that all profiles must be sent to the site C headquarters when the project is finished.

### **ACDB/KDC operation**

At the headquarters site, all three profiles are imported into the ACDB/KDC program. The result is a global tree of resources that includes each KPDSNP and CRC device in each site.

Importing all the profiles into one ACDB/KDC program creates the global database.

When additions or changes to the KPDSNP database are made, headquarters can transmit the changes to the affected sites.
