**Education** means considerably more than **just teaching** a student to read, write, and manipulate numbers. Computers, the Internet, and advanced electronic devices are becoming essential in everyday life and have changed the way information is gathered. How this new technology is utilized in the curriculum and managed by teachers will have an important role to play in widening the resource and knowledge base for all students.

**Technology** affects the way teachers teach and students learn. **To make** the best use of information technology **IT**, schools need a workable plan to fully integrate it into all aspects of the curriculum so students are taught how, why, and when to use technology to further enhance their learning.

**If a school** does not have a clear plan of how and why it wishes to implement IT, then it runs the risk of wasting money. In schools today, nearly all classrooms have access to a computer. However, many schools mistake this as incorporating information technology into the curriculum. School staff need to research what IT is available and what would best serve the school's purpose, not simply purchase the latest equipment. **There should be** a policy stating how IT is going to assist pupils' development and what teachers want pupils to achieve. **(Reksten, 2000)** Staff members need to be clear about what they want IT to do for them, before they can start incorporating it **into their lessons**.

The only way information technology is going to be useful to schools is if all staff members are well-informed and fully supported. It is the principal's responsibility, and should be part of the school's plan, to ensure that all staff are consulted about the changes, and that the change is carefully organised. Some teachers may be resistant, especially if they have not had much experience with computers, so training teachers is essential in implementing IT into the school curriculum. Staff members must feel involved in the process of acquiring technology, and in learning how to operate it, in order for them to increase their confidence in using IT as a curriculum tool. Teachers are only going to be able to incorporate IT into their lessons **if they are competent users themselves** **(Reksten, 2000)**.

In addition, teachers need to be aware that IT within the classroom is extremely flexible, but that they need to plan what purpose IT serves in each lesson. The skills a child learns are the

**Comment [dcd6]: Structure: Body paragraphs**  
The first sentence of this paragraph is the topic sentence. It signals that the paragraph is about how schools need a clear plan for implementing IT. This point follows up on the first point made in the thesis statement: schools need a workable plan. See [essay body paragraphs](#).

**Comment [dcd7]: Structure: Body paragraphs**  
This statement moves into specifics. It details particular actions that a school can do to develop an IT plan. See [essay body paragraph 1st](#).

**Comment [dcd8]: Referencing: In-text citation**  
This in-text citation indicates that the idea presented in this sentence is taken from an outside source. The in-text citation gives the surname of the author (Reksten) and the year the source was published (2000). This citation uses APA style. See [APA in-text citation](#).

**Comment [dcd9]: Structure: Body paragraphs**
