

8th Grade Argumentative Essay Example

Topic: Student/Youth Environmental Activism

The environment is under siege due to human activity. Issues like climate change, the loss of biodiversity, and deforestation are wreaking havoc on the world. According to a letter written for *The Guardian* by youth climate activists, humans are in the middle of the "sixth mass extinction of species" on this planet. Whenever there are issues that need solving, humans always seem to want to become activists in order to do or fix something. And, some students have decided to take action by skipping school to protest and strike for the climate and the environment. But, students should not be environmental activists, although environmental consciousness should be practiced.

School is important. And, if students are skipping school to protest, they could potentially miss out on essential information, including environmental education. According to the *Norfolk* article, "Young People Urged . . ." students from "more than 150 schools skipped school" to participate in "another series of worldwide protests." Even though protesting seems like a good way to bring awareness to the issues the world is experiencing with climate, students should not be giving up their time in school. Additionally, *University of the People* states that "[s]ocieties with higher . . . levels of education tend to be healthier, have higher rates of economic stability, lower crime, and greater equality" (*Benefits of Education Are Societal and Personal*). This shows that school is essential to a thriving society. When students are in school, they learn how to speak and write better and potentially learn more about ways to help the environment. Without the time in school to learn all of that adequately, youth protests will just be composed of a swarm of uneducated and uninformed students who will not be able to clearly explain or defend their cause. Rich Lowry, in his opinion piece for the *Boston Herald*, states that "kids have nothing interesting to say to [adults]." And, an uneducated and uninformed kid just creates even more dismissive reactions from adults when students are trying to speak about issues they care about on a world stage.

Also, at this point, it is too late to reverse the effects of climate change, so student activist efforts are pointless. The article, "...Top 5 Environmental Concerns . . ." states that a "recent United Nations report" said that if we do not make revolutionary changes in human behavior, the "planet will suffer dramatically from global warming in just 12 years." This proves that humans do not have enough time to change their fate. With most people being selfish and stuck in the ways of instant gratification and greed, it would take a lot longer than a decade to change the minds and behaviors of people on Earth. George Marshall, in his book *Don't Even Think About It*, "draws on a wide range of social science research to explain why we, as a species, would prefer not to think

The Argument Writing Toolkit Sean Ruday, 2015-07-16 In order for students to write effective arguments they need to read good arguments In this practical book you ll find out how to use mentor texts to make writing instruction more meaningful authentic and successful Author Sean Ruday demonstrates how you can teach middle school students to analyze the qualities of effective arguments and then help them think of those qualities as tools to improve their own writing You ll learn how to Introduce high interest topics to students to get them interested and engaged in argument writing Teach students to look at multiple sides of an issue and critically evaluate evidence to construct informed defensible arguments Make argument writing an interactive student driven exercise in which students pursue their own writing projects Use mentor texts to help students learn the core concepts of argument writing and apply those skills across the curriculum The book is filled with examples and templates you can bring back to the classroom immediately as well as an annotated bibliography which links the concepts in this book to the corresponding Common Core State Standards Blank templates are also available as printable eResources on our website <http://www.routledge.com/9781138924390> **Teaching and Learning**

Proof Across the Grades Despina A. Stylianou, Maria L. Blanton, Eric J. Knuth, 2010-09-23 A Co Publication of Routledge for the National Council of Teachers of Mathematics NCTM In recent years there has been increased interest in the nature and role of proof in mathematics education with many mathematics educators advocating that proof should be a central part of the mathematics education of students at all grade levels This important new collection provides that much needed forum for mathematics educators to articulate a connected K 16 story of proof Such a story includes understanding how the forms of proof including the nature of argumentation and justification as well as what counts as proof evolve chronologically and cognitively and how curricula and instruction can support the development of students understanding of proof Collectively these essays inform educators and researchers at different grade levels about the teaching and learning of proof at each level and thus help advance the design of further empirical and theoretical work in this area By building and extending on existing research and by allowing a variety of voices from the field to be heard Teaching and Learning Proof Across the Grades not only highlights the main ideas that have recently emerged on proof research but also defines an agenda for future study

The Skills of Document Use Jean-François Rouet, 2006 Publisher Description **Making Standards Useful in the Classroom** Robert J. Marzano, Mark W. Haystead, 2008 It s true that state standards often have way too much content and aren t written in a way that enhances classroom instruction and formative assessment That s why this guide is invaluable for any educator who wants to ensure that standards actually lead to higher student achievement The authors give you good reasons for why some content standards should be dropped and explain how benchmark statements in standards should be rewritten Learn how to sequence content and set up grading scales that help facilitate formative assessment and effective instruction And get clear steps for unpacking and converting standards into guidelines that are much more useful to

classroom teachers To implement this book's much more efficient approach the authors included over 240 pages of detailed scoring scales and sample measurement topics for K-8 science math language arts social studies and critical life skills topics for elementary through high school students

Developing Discourse Practices in Adolescence and Adulthood Susan Hynds, 1990 Examines how people develop their reading and writing skills during adolescence and adulthood This collection is based on the premise that four basic stances/orientations underlie the discourse practices: social, textual, institutional, and field These four stances form the organizing rubric for these 17 papers Annotation copyrighted by Book News Inc Portland OR

A Comparative Study of Writing Abilities in Two Modes at the Grade 5, 8, and 12 Levels Ian Pringle, Aviva Freedman, Ontario. Ministry of Education, Ontario. Ministry of Colleges and Universities, 1985 The third of three studies involving a comparative analysis of transactional and narrative writing of selected samples of students in two Ontario districts this study addressed questions arising from the earlier studies and examined the writing skills of students in grades 5, 8, and 12 Writing samples were examined for conformity to the norms of story structure and argumentation and the subject matter of the transactional writing was analyzed The level of affective development manifested in subsamples of both the stories and the arguments was rated All the papers in the sample were analyzed for syntactic complexity scores and for mechanical and conventional errors Comparisons of the first and second versions of the papers were made to assess skills in revising and editing Findings indicated the need of students to learn how to write an argument and to revise a paper Other implications were 1 that since the level of difficulty of one aspect of a writing task may decrease the lack of control in another teachers must take into account the nature of difficulties in the tasks they set students and make their assessments accordingly 2 that students at all levels should be given occasions to write narratives 3 that the model of persuasive discourse should be countered and 4 that writing strategies recommended by authorities need to be implemented EL
