Handbook of Research on Teaching and Learning in K-20 Education Wang, Viktor, 2013-06-30 While the general agreement in education remains that the more senses involved in learning the better we learn, the question still remains as to the distinction between the education of children and the education of adults. *Handbook of Research on Teaching and Learning in K-20 Education* provides well-rounded research in providing teaching and learning theories that can be applied to both adults and children while acknowledging the difference between both. This book serves as a comprehensive collection of expertise, research, skill, and experiences which will be useful to educators, scholars, and practitioners in the K-12 education, higher education, and adult education fields.

Inequality for All William H. Schmidt, Curtis McKnight, 2015-04-17 *Inequality for All* makes an important contribution to current debates about economic inequalities and the growing achievement gap, particularly in mathematics and science education. The authors argue that the greatest source of variation in opportunity to learn is not between local communities or even schools but between classrooms. They zero in on one of the core elements of schooling: coverage of subject matter content, and examine how such opportunities are distributed across the millions of school children in the United States. Drawing on data from the third TIMSS international study of curriculum and achievement as well as a six-district study of over 500 schools across the United States, they point to Common Core State Standards as being a key step in creating a more level playing field for all students. William H. Schmidt is University Distinguished Professor at Michigan State

University and co director of the Education Policy Center Curtis C McKnight is emeritus professor of mathematics at the University of Oklahoma
