rationale for a stronger and more sustained approach to algebra in school as well as concrete examples of how algebraic reasoning may be developed in the early grades It is organized around three themes The Nature of Early Algebra Students Capacity for Algebraic Thinking Issues of Implementation Taking Early Algebra to the Classrooms The contributors to this landmark volume have been at the forefront of an effort to integrate algebra into the existing early grades mathematics curriculum They include scholars who have been developing the conceptual foundations for such changes as well as researchers and developers who have led empirical investigations in school settings Algebra in the Early Grades aims to bridge the worlds of research practice design and theory for educators researchers students policy makers and curriculum developers in mathematics education

*Fate Of Schrodinger's Cat, The: Using Math And Computers To Explore The Counterintuitive* James D Stein, 2020-07-14 Can we correctly predict the flip of a fair coin more than half the time or the decay of a single radioactive atom Our intuition based on a lifetime of experience tells us that we cannot as these are classic examples of what are known to be 50/50 guesses But mathematics is filled with counterintuitive results and this book discusses some surprising and entertaining examples It is possible to devise experiments in which a flipped coin lands heads

completely at random half the time but we can also correctly predict when it will land heads more than half the time The Fate of Schrodinger's Cat shows how high school algebra and basic probability theory with the invaluable assistance of computer simulations can be used to investigate both the intuitive and the counterintuitive This book explores fascinating and controversial questions involving prediction decision making and statistical analysis in a number of diverse areas ranging from whether there is such a thing as a hot hand in shooting a basketball to how we can successfully predict more than half the time the decay of the radioactive atom that determines the fate of Schrodinger's Cat *Time* Briton Hadden, Henry R.
