Topic: Student/Youth Environmental Activism

Issues like climate change, the loss of biodiversity, and deforestation are wreaking havoc on the world. According to a letter written for *The Guardian* by youth climate activists, humans are in the middle of the "sixth mass extinction of species" on our planet. Some students are taking action by skipping school to protest and strike for climate and the environment. However, in my opinion, students should not be environmental activists.

To begin, students should not be environmental activists because it keeps them from learning essential information in school. First of all, according to the *Newsweek* article, "Young People Urged . . .," students from "more than 150 students skipped school" to participate in "another series of worldwide protests." Even though protesting seems like a good way to bring awareness to the issues the world is experiencing with climate, students should not be giving up their time in school. Secondly, University of the People states that "[s]ocieties with higher . . . levels of education tend to be healthier, have higher rates of economic stability, lower crime, and greater equality" ("Benefits of Education Are Societal and Personal"). This shows that school is essential to a thriving society. Without the time in school to learn important and basic skills, youth protesters are just creating a swarm of uneducated and uninformed students who will not be able to clearly explain their cause. And, society will suffer, because of the lack of fully educated members.

Also, students should not be environmental activists because at this point, it is too late to reverse the effects of climate change, so activist efforts are pointless. To begin, in the article, "...Top 5 Environmental Concerns. . ." it states that a "recent United Nations report" said that if we don't make revolutionary changes in human behavior, the "planet will suffer dramatically from global warming in just 12 years." This proves that we really do not have enough time to change the fate of humanity. With most people being selfish and stuck in the ways of instant gratification and greed, it would take a lot longer than a decade to change the minds and behaviors of people on Earth. Additionally, George Marshall, in his book *Don't Even Think About It*, "draws on a wide range of social science research to explain why we, as a species, would prefer not to think about climate change, its implications, or what our response to it should be" ("A Climate of Mind"). This proves that humans are biologically programmed to not be concerned for the future of our climate. People are concerned about living for now. There is no changing their minds—by persuasion or even science.

On the other side, some people believe that students should be taking action and skipping school to protest and strike. In a letter youth climate activists wrote for *The Guardian*, they said "We have the right to live our dreams and hopes. . .we can and will stop this madness. . .we, the young people, will

A Comparative Study of Writing Abilities in Two Modes at the Grade 5, 8, and 12 Levels Ian Pringle, Aviva Freedman, Ontario. Ministry of Education, Ontario. Ministry of Colleges and Universities, 1985 The third of three studies involving a comparative analysis of transactional and narrative writing of selected samples of students in two Ontario districts this study addressed questions arising from the earlier studies and examined the writing skills of students in grades 5 8 and 12 Writing samples were examined for conformity to the norms of story structure and argumentation and the subject matter of the transactional writing was analyzed The level of affective development manifested in subsamples of both the stories and the arguments was rated All the papers in the sample were analyzed for syntactic complexity scores and for mechanical and conventional errors Comparisons of the first and second versions of the papers were made to assess skills in revising and editing Findings indicated the need of students to learn how to write an argument and to revise a paper Other implications were 1 that since the level of difficulty of one aspect of a writing task may decrease the lack of control in another teachers must take into account the nature of difficulties in the tasks they set students and make their assessments accordingly 2 that students at all levels should be given occasions to write narratives 3 that the model of persuasive discourse should be countered and 4 that writing strategies recommended by authorities need to be implemented EL

Teaching Writing Gail E. Tompkins, 1994 Book From mid 1970 to early 1974 The Who undertook an amazing and peculiar journey in which they struggled to follow up Tommy with a yet bigger and better rock opera One of those projects Lifehouse was never completed though many of its songs formed the bulk of the classic 1971 album Who's Next The other Quadrophenia was as down to earth as the multimedia Lifehouse was futuristic issued as a double album in 1973 it eventually became esteemed as one of The Who's finest achievements despite initial unfavorable comparisons to Tommy

Along the way the group's visionary songwriter Pete Townshend battled conflicts within the band and their management as well as struggling against the limits of the era's technology as a pioneering synthesizer user and a conceptualist trying to combine rock with film and theatre. The results included some of rock's most ambitious failures and some of its most spectacular triumphs. In *Won't Get Fooled Again*, noted rock writer and historian Richie Unterberger documents this intriguing period in detail, drawing on many new interviews, obscure rare archive sources, and recordings, and a vast knowledge of the music of the times. The result is a comprehensive, articulate history that sheds new light on the band's innovations and Pete Townshend's massive ambitions, some of which still seem ahead of their time in the early 21st century.
