

How to Write an "Accomplishment Essay"

What are your three most substantial accomplishments, and why do you view them as such? — Harvard

What is the most significant change or improvement you have made to an organization with which you have recently been affiliated? Describe the process you went through to identify the need for change and manage the process of implementing change. What were the results? — Kelley

Describe your greatest professional achievement and how you were able to add value to your organization. — Johnson

The goal in answering this kind of question is to analyze, rather than summarize, an achievement. This advice is particularly true if you're discussing an accomplishment that is listed elsewhere on the application. Your readers want to gain insight into your character, not read a factual summary of what occurred.

Here are some guiding principles to use in constructing your answer:

(1) Choose something that's **meaningful** to you. Some applicants feel obligated to choose the most objectively impressive accomplishments. You should write about something that has personal significance, even if you weren't formally recognized for it. What matters is that you write passionately and insightfully about your subject. Unless otherwise specified, you should feel free to draw on academic, personal, or professional successes.

(2) Focus on **details** about the process. Show the reader through concrete details how you achieved what you did. If you want to discuss a grade you earned in a particularly challenging class, show us how you mastered the material. For example, describe creative strategies you used; don't rely on clichés like "I succeeded through hard work."

(3) Build tension, **Describe obstacles** and how you overcame them. Note initial difficulties or intermediate failures, then show how you recovered. By adding a sense of drama to your story, you will not only keep the reader interested, but also make the accomplishment seem that much more significant.

(4) Evaluate **the significance** of the accomplishment. Again, the goal here is to add insight

How did you work towards achieving the accomplishment? What steps did you take? What obstacles did you encounter? What were people's reactions as you worked towards the accomplishment?

Alternative Approaches to the Assessment of

Achievement David L. McArthur, 2012-12-06 Ingrained for many years in the science of educational assessment were a large number of truths about how to make sense out of testing results artful wisdoms that appear to have held away largely by force of habit alone Practitioners and researchers only occasionally agreed about how tests should be designed and were even further apart when they came to interpreting test responses by any means other than categorically right or wrong Even the best innovations were painfully slow to be incorporated into practice The traditional approach to testing was developed to accomplish only two tasks to provide ranking of students or to select relatively small proportions of students for special treatment In these tasks it was fairly effective but it is increasingly seen as inadequate for the broader spectrum of issues that educational measurement is now called upon to address Today the range of questions being asked of educational test data is itself growing by leaps and bounds Fortunately to meet this challenge we have available a wide panoply of resource tools for assessment which deserve serious attention Many of them have exceptionally sophisticated mathematical foundations and succeed well where older and less versatile techniques fail dismally Yet no single new tool can conceivably cover the entire arena
