Learning Objectives:

1. Explain how to account for current liabilities.
2. Describe the major characteristics of bonds.
3. Explain how to account for bond transactions.
4. Discuss how liabilities are reported and analyzed.

Learning Objective 1: Explain how to account for current liabilities.

Current Liabilities

1. Company expects to pay the debt from existing current assets or through the creation of other current liabilities.
2. Company will pay the debt within one year or the operating cycle, whichever is longer.
3. Current liabilities include: notes payable, accounts payable, unearned revenues, and accrues liabilities such as taxes.

Notes Payable

- ◆ Written promissory note.
- ◆ Require the borrower to pay interest.
- ◆ Those due within one year of the balance sheet date are usually classified as current liabilities.

Illustration: First National Bank agrees to lend \$100,000 on September 1, 2022, if Cole Williams Co. signs a \$100,000, 12%, four-month note maturing on January 1.

When a company issues an interest-bearing note, the amount of assets it receives generally equals the note's face value.

CAAs	100000	
Notes payable (record the notes payable from the first 4 months)		100000

If Cole Williams Co. prepares financial statements annually, it makes an adjusting entry at December 31 to recognize interest.

Interest expense = $100000 \times 12\% \times 4/12 = 4000$

Interest Expense	4000	
Interest Payable		4000

At maturity (January 1), Cole Williams Co. must pay the face value of the note plus interest. It records payment as follows.
