**Media and Social Inequality** John Pollock, 2014-06-11 This book is among the first to systematically explore the impact of community inequality on reporting political and social change. Although most journalism scholars are still fascinated by the impact of media on society, *Media and Social Inequality* explores the reverse perspective: the impact of society on media. Using a community structure approach and rejecting the perspective that studies of media and audiences can be reduced to the individual level of psychological phenomena, all contributions examine connections between community level macro characteristics and variations in the coverage of critical issues. This innovative book differs from previous community structure volumes in two ways. First, contributions explore a far wider range of community characteristics by employing creative methodologies, modern archives and databases that facilitate larger, more diverse samples, multilevel and longitudinal analyses, composite measures of both content and editorial judgment, new technologies and social network analysis. Second, a traditional emphasis on media as instruments of political and social control is replaced by media as potential mirrors of social change, exploring bottom up measures of vulnerability, concentrated disadvantage and ethnic diversity pluralism. The volume contains two original chapters, one on nationwide US coverage of the Occupy movement in the expanded introduction and another on nationwide US coverage of universal health care. This book was originally published as a special issue of *Mass Communication and Society*.
