**Setting Limits** Pekka Sulkunen, Thomas F. Babor, Jenny Cisneros Ornberg, Michael Egerer, Matilda Hellman, Charles Livingstone, Virve

Marionneau, Janne Nikkinen, Jim Orford, Robin Room, Ingeborg Rossow, 2018-12-06 Commercial gambling is a recent historical phenomenon. It has developed into a profitable industry that supplies a range of recreational activities to its customers and is a significant way of collecting money from players to distribute to companies, state budgets and other beneficiaries. Many of these are civil society organizations using the money for producing services in sports, culture, social work and health care. However, gambling can also develop into pathological behaviour. Using a public interest framework, this book discusses the policies that will best serve the public good and minimize individual and collective harms. After describing the historical context of the gambling and the current global burden of the activity, available methods of regulating the industry are evaluated using the available scientific evidence. By analysing the effectiveness of gambling policies and their alignment with the public interest, the epidemiological obstacles to successful regulation are considered in detail. There is good evidence for the effectiveness of restrictions on availability and access, but preventing gambling-related harm is not possible without limiting the overall volume of the activity and hence the profits for the gambling industry and governments. Taking an international approach, this book delivers a comprehensive review of the epidemiological evidence documenting the harmful effects of gambling on individuals, communities and societies. Essential reading for policymakers, social and behavioural scientists in gambling research and public health researchers. *Setting Limits* examines a global view of an emerging epidemic of gambling problems. The Field of Water Policy Franck Poupeau, Brian O'Neill, Joan Cortinas Muñoz, Murielle

Coeurdray, Eliza Benites-Gambirazio, 2019-12-06 Bringing together the analysis of a diverse team of social scientists, this book proposes a new approach to environmental problems. Cutting through the fragmented perspectives on water crises, it seeks to shift the analytic perspectives on water policy by looking at the social logics behind environmental issues. Most importantly, it analyzes the dynamic influences on water management as well as the social and institutional forces that orient water and conservation policies. The first work of its kind, *The Field of Water Policy: Power and Scarcity in the American Southwest* brings the tools of Pierre Bourdieu's field sociology to bear on a moment of environmental crisis with a study of the logics of water policy in the American Southwest, a region that allows us to see the contest over the management of scarce resources in a context of lasting drought. As such, it will appeal to scholars in the social and political sciences with interests in the environment and the management of natural resources.
