Content Area Focus The analysis of gender equity within specific curriculum areas has been expanded from 6 to 10 chapters, including mathematics, science, and engineering. Global Diversity Focus Global gender equity is addressed in a separate chapter, as well as in numerous other chapters. The expanded section on gender equity strategies for diverse populations contains seven chapters on African Americans, Latinas/os, Asian and Pacific Island Americans, American Indians, gifted students, students with disabilities, and lesbian, gay, bisexual, and transgender students. Action Oriented All chapters contain practical recommendations for making education activities and outcomes more gender equitable. A final chapter consolidates individual chapter recommendations for educators, policymakers, and researchers to achieve gender equity in and through education. New Material Expanded from 25 to 31 chapters, this new edition includes more emphasis on male gender equity and on sexuality issues special within population gender equity challenges, race, ability, and disability, etc. coeducation and single sex education, increased use of rigorous research strategies such as meta analysis, showing more sex similarities and fewer sex differences, and of evaluations of
