Scientific Inquiry Cycle: Review

Science helps researchers solve problems by applying knowledge and creating testing other "based" with a test. Many tests are used to solve problems, using various methods or techniques. Solutions can have a positive impact. Understanding the problem fully, including its causes and effects, is the first step in finding an effective solution.

Designing solutions requires considering various constraints, such as budget, time, and safety concerns. Documenting the steps of a solution helps track progress, evaluate results, and is important to weigh trade-offs carefully. For example, creating materials for a house that may affect its cost and ease of use, which influence the effectiveness of the solution.

After developing a solution, documenting how it works, what constraints affected it, and any compromises made helps others learn and possibly improve on the idea. Communication, sharing knowledge openly, and reflecting on the impacts of the innovation are essential steps. This process involves weighing science, safety, and ethics, responsible decision-making, and being communicative.

6. Mark the best answer for each question.

1. What is the first important step when applying science to solve a local problem?
- Designing a solution immediately
 - Using the most expensive materials
 - Ignoring safety concerns
 - Understanding the problem fully

2. What does documenting constraints in a solution help with?
- Ignoring the problems of the solution
 - Tracking constraints like budget and safety
 - Showing how to solve the problem
 - Demonstrating that the solution has no risks

3. Which is an example of a trade-off?
- Finding a solution without any constraints
 - Ignoring safety concerns
 - Using the most expensive materials
 - Using unsafe materials

4. Why is it important to document the steps of a solution?
- To avoid any safety or health concerns
 - To make others aware
 - To track the progress and safety
 - To avoid documenting the steps

6. Mark if the statement is True (T) or False (F).

When making a solution, it is important to consider the safety of the solution. When applying science to solve a problem, it is important to consider the safety of the solution. When applying science to solve a problem, it is important to consider the safety of the solution.

Answer for each question.
