City-County Consolidation and Its Alternatives: Reshaping the Local

Government Landscape J.B. Carr, Richard C. Feiock, 2016-07-08 City country consolidation builds upon the Progressive tradition of favoring structural reform of local governments. This volume looks at some important issues confronting contemporary efforts to consolidate governments and develops a theoretical approach to understanding both the motivations for pursuing consolidation and the way the rules guiding the process shape the outcome. Individual chapters consider the push for city county consolidation and the current context in which such decisions are debated along with several alternatives to city county consolidation. The transaction costs of city county consolidation are compared against the costs of municipal annexation inter local agreements and the use of special district governments to achieve the desired consolidation of services. The final chapters compare competing perspectives for and against consolidation and put together some of the pieces of an explanatory theory of local government consolidation.

The New Public Service Janet V. Denhardt, Robert B. Denhardt, 2015-03-12 The New Public Service Serving not Steering provides a framework for the many voices calling for the reaffirmation of democratic values citizenship and service in the public interest. It is organized around a set of seven core principles 1 serve citizens not customers 2 seek the public interest 3 value citizenship and public service above entrepreneurship 4 think strategically act democratically 5 recognize that accountability isn't simple 6 serve rather than steer and 7 value people not just productivity. The New Public Service asks us to think carefully and critically about what public service is why it is important and what values ought to guide what we do and how we do it. It celebrates what is distinctive important and meaningful about public service and considers how we might better live up to those ideals and values. The revised fourth edition includes a new chapter that examines how the role and significance of these New Public Service values have expanded in practice and research over the past 15 years. Although the debate about governance will surely continue for many years this compact clearly written volume both provides an important framework for a public service based on citizen discourse and the public interest and demonstrates how these values have been put into practice. It is essential reading for students and serious practitioners in public administration and public policy.
