

(b) The figure below is a histogram of 200 diameters obtained by using one of the two sampling methods described. Considering the shape of the histogram, explain which method, Method 1 or Method 2, was most likely used to obtain a such a sample.

(c) Which of the two sampling methods, Method 1 or Method 2, will result in less variability in the diameters of the 200 tortillas in the sample on a given day? Explain.

Each day, the distribution of the 200,000 tortillas made that day has mean diameter 6 inches with standard deviation 0.11 inch.

(d) For samples of size 200 taken from one day's production, describe the sampling distribution of the sample mean diameter for samples that are obtained using Method 1.

(e) Suppose that one of the two sampling methods will be selected and used every day for one year (365 days). The sample mean of the 200 diameters will be recorded each day. Which of the two methods will result in less variability in the distribution of the 365 sample means? Explain.

(f) A government inspector will visit the facility on June 22 to observe the sampling and to determine if the factory is in compliance with the advertised mean diameter of 6 inches. The manager knows that, with both sampling methods, the sample mean is an unbiased estimator of the population mean. However, the manager is unsure which method is more likely to produce a sample mean that is close to 6 inches on the day of sampling. Based on your previous answers, which of the two sampling methods, Method 1 or Method 2, is more likely to produce a sample mean close to 6 inches? Explain.

students who earn at least a 3 college credit and or advanced placement You should check with your school guidance office  
about specific college requirements **STUDYING FOR YOUR AP EXAMINATION** It is never too early to start studying The  
earlier you begin the more time you will have to sharpen your skills Do not procrastinate Cramming is not an effective way to  
study since it does not allow you the time needed to learn the test material It is very important for you to choose the time and  
place for studying that works best for you Some students may set aside a certain number of hours every morning to study  
while others may choose to study at night before going to sleep Other students may study during the day while waiting on a  
line or even while eating lunch Only you can determine when and where your study time will be most effective But be  
consistent and use your time wisely Work out a study routine and stick to it When you take the practice exam s try to make  
your testing conditions as much like the actual test as possible Turn your television and radio off and sit down at a quiet table  
free from distraction Make sure to time yourself Complete the practice test s score your test s and thoroughly review the  
explanations for the questions you answered incorrectly However do not review too much during any one sitting Concentrate  
on one problem area at a time by reviewing the question and explanation and by studying our review s until you are confident  
that you completely understand the material Since you will be allowed to write in your test booklet during the actual exam  
you may want to write in the margins and spaces of this book when practicing However do not make miscellaneous notes on  
your answer sheet Mark your answers clearly and make sure the answer you have chosen corresponds to the question you  
are answering Keep track of your scores This will enable you to gauge your progress and discover general weaknesses in  
particular sections You should carefully study the reviews that cover the topics causing you difficulty as this will build your  
skills in those areas To get the most out of your studying time we recommend that you follow the Study Schedule It details  
how you can best budget your time **TEST TAKING TIPS** Although you may be unfamiliar with tests such as the Advanced  
Placement exams there are many ways to acquaint yourself with this type of examination and help alleviate your test taking  
anxieties Listed below are ways to help yourself become accustomed to the AP exam some of which may also be applied to  
other standardized tests Become comfortable with the format of the AP Examination in Statistics When you are practicing to  
take the exam s simulate the conditions under which you will be taking the actual test s You should practice under the same

time constraints as well Stay calm and pace yourself After simulating the test only a couple of times you will boost your chances of doing well and you will be able to sit down for the actual test much more confidently Know the directions and format for each section of the exam Familiarizing yourself with the directions and format of the different test sections will not only save you time but will also ensure that you are familiar enough with the AP exam to avoid anxiety and the mistakes caused by being anxious Work on the easier questions first If you find yourself working too long on one question make a mark next to it in your test booklet and continue After you have answered all of the questions that you can go back to the ones you have skipped Use the process of elimination when you are unsure of an answer If you can eliminate three of the answer choices you have given yourself a fifty fifty chance of getting the item correct since there will only be two choices left from which to make a guess If you cannot eliminate at least three of the answer choices you may choose not to guess as you will be penalized one quarter of a point for every incorrect answer Questions not answered will not be counted Be sure that you are marking your answer in the oval that corresponds with the correct item in the test booklet Since the multiple choice section is graded by machine marking the wrong answer will throw off your score Proceedings of the Section on Statistical Education American Statistical Association.
