**Education in the Indian Job Market. A Study of Indian Universities and Corporate Libraries** Bobby Goswami  
Baruah,2019-07-09 Doctoral Thesis Dissertation from the year 2014 in the subject Library Science Information  
Documentation Science grade A language English abstract This study examines the Information Science Education of Indian  
Universities and Corporate Libraries with a specific focus on how the criteria of the Indian job Market are met within the  
context of this education The Library and Information Science curriculum needs to adapt to the changes in today's job  
market requirement The job market demands much more competencies including information and communication skills  
However various studies reported a lacuna in the profession in terms of being fully compatible to the job requirement or in  
other words the profession fails to meet the expectations of the job market Here the enquiry arises as to who is accountable  
Are the LIS curricula in the universities offering Library and Information Science courses not up to date and practical  
oriented or not at par with the job descriptions for LIS professionals in different sectors This big question is affecting the  
whole profession globally but steps have been taken in some developing countries to streamline the curricula with diverse job  
requirements When we talk in terms of India a lot has been discussed and talked about the current library and information  
science professionals in the context of the emerging Indian job market But steps to modify, remodel and implement the  
curricula as per national and global necessities are yet to be done This is the main problem in statement There are two major  
concerns firstly the inclusion of ICT and non ICT course contents in the curricula and secondly the job requirements of  
corporate and university libraries The critical examination of the specific needs of the corporate employees should be given  
due consideration in redesigning the curricula The non lucrativeness of jobs for the LIS professionals could also be an issue  
that concerns the fraternity that can be solved by dealing first with the course contents The rationale behind this study is not  
only to critically examine the curriculum of the post graduate levels currently followed in India and study the job  
requirements of university and corporate libraries but also to identify the discrepancies and thereby come up with some  
concrete measures A review of the results on earlier empirical studies carried out in India indicates that the variables in the  
study curriculum and job requirement are examined from different perspectives of narrower scales but no studies of the  
intended magnitude and landscape are done so far     **The SMART Way** Glennis Zilm,2009 The SMART Way is an
