On Wednesday Dec. 14 you will have to answer one of the following:

1. A professional entertainer is well known for attention getting behaviors; he regularly changes his hair color, has numerous and conspicuous tattoos and is consistently quoted in the media expressing very extreme, highly controversial views.

Discuss the basic points of emphasis of each of the following psychological perspectives, and tell how proponents of each might account for the entertainer's behavior.

- a. Biological perspective
- b. Trait/type perspective
- c. Psychoanalytic/psychodynamic perspective
- d. Behavioral perspective
- e. Humanistic perspective

2. A researcher designs an experiment to study the effect of an audience on individual college students during their performance of a difficult manual dexterity task. He will assign 20 students to each of two conditions. In one, the students will use a pair of tweezers to place small cubes of wood into a box (which has one tiny opening at the top) while being observed by an "audience" of 30 peers; in the second condition, a different set of volunteers will perform the task with no audience present. All participants will have 30 seconds to place as many cubes of wood into the box as possible. The researcher hypothesizes that the group that performs the task with no audience present will outperform the group which works in front of an audience.

Refer specifically to this research scenario in responding to each of the following:

- a. Discuss an issue of operational definitions in this study
- b. Discuss an appropriate procedure for choosing and assigning participants
- c. Identify an experimental group
- d. Identify the control group
- e. Identify the independent variable
- f. Identify the dependent variable
- g. Discuss appropriate controls for any one possible confounding variable
- h. Discuss appropriate controls for possible experimental bias.
