Royce, 1981 A study on alcoholism thoroughly documented as a college text but practical enough to be of interest to para professionals and counselors who wish to update their knowledge and the one million recovered alcoholics who are eager to learn more about their illness *Spirituality in the Workplace* Stephen J. Broadhurst, 2021-04-26 As we become more and more of a global trading world the challenges of leading and managing within this turbulent environment and its associated complex interconnected markets and disconnected relationships are indisputable so just how far can any change requirements be practically engaged with whilst also keeping the employee at the organisation's central core Today's business world cries out for people who can lead with a cross cultural global perspective who can lead from the heart as well as the mind and address and manage problems on not just an integrated local level but also with a healthy holistic perspective The subject of spirituality has long been discussed within academic research but there still seems to be a misunderstanding and stagnation of both its real meaning and application amongst business academics the population and organisations alike This book aims to provide a realistic message to help those who are looking for some answers for those who are looking for a way to advance their own skill set and progress both their careers and the organisation's current

standing to move from being confused and insecure about strategies and tactics to positively contributing to not only their own but also to the employees well being and the business s overall purpose and intention By basing the content upon real and relevant interesting modern day perspectives applications requirements opportunities and benefits all combined into a manual for thought and a practical framework for action this book will significantly and realistically move the subject of spirituality forward This book will be of interest to researchers academics and students with a special interest in the positive influence of spirituality within the workplace and everyday healthy living Al-Anon Narratives Grazyna Zajdow,2002-08-30 According to the author in Australia men drink alcohol as a mark of masculinity and women take care of drinking men as a part of normative femininity And while research on alcoholics and alcoholism is common very few studies consider the lives of the women who are married to alcoholics Here Zajdow details and explores the lives of such women who belong to Al Anon where they may share their experiences and offer their stories in a nonthreatening and supportive environment The author presents the narratives of these women in the context of her analysis of the self help group to demonstrate how people construct and reconstruct their lives as coherent stories about themselves and to show how these self stories can be changed and reconceptualized within the context of the group Unique in its examination of self stories offered within a self help group this book challenges sociological knowledge about the way these mutual aid groups operate as communities of interest and help Zajdow begins by laying the groundwork through a discussion of the professional and lay discourses on women s relationships to alcoholic men She then provides the basis for using self stories to examine a group of people the individuals in the group and the behavior of the group in general A history of Al Anon as a self help group is also detailed and the author compares the Australian meetings to meetings in other parts of the world The stories themselves are then examined and discussed in terms of how they relate to group processes and individual change through Al Anon Tracing the way that these women move from a place of despair to one of hope and meaningful change this also represents a sociological exploration of gender families and communities

Catalog of Books** ,1996 Older Americans Information Directory ,1999 **Treatment and Rehabilitation of the Chronic Alcoholic** Benjamin Kissin,1977-01-01 The present volume contains a large variety of treatment approaches to the long term rehabilitation of the alcoholic ranging from the biological to the physiological to the psychological to the social The multiplicity of proposed therapies each of which has its strong proponents suggests that alcoholism is either a complex medical social disease syndrome requiring a multipronged treatment approach or a very simple illness for which we have not yet discovered the remedy The latter may indeed be true but we cannot use what we do not know and must use what we do know We do however have the obligation to be responsible in our treatment to provide the best that is known at this time and to be discriminating in our prescription of appropriate treatment for individual patients If there is one conclusion we would like to offer in our preface it is that alcoholics constitute a markedly heterogeneous population with widely disparate needs for whom at least at our present level of knowledge a broad spectrum of treatment modalities is necessary If this is true then probably most of this book has validity With this volume on the treatment and rehabilitation of the chronic alcoholic we bring to completion our five volume series The Biology of Alcoholism As the title of the present volume indicates we have departed from our original intention to deal solely with biological aspects of the syndrome and have attempted rather to produce a more comprehensive work
