**Internationalization of Language Education** Vander Tavares, Sílvia Melo-Pfeifer, 2025-12-22 This handbook provides a systematic overview of language education from the perspective of internationalization. Internationalization includes but also goes beyond the integration of intercultural and international perspectives practices and dispositions into education with the objective of improving pluralizing and decolonizing pedagogy and research in response to the changes and challenges facing society today. Despite its affordances for institutional curricular and individual development in the context of language education as a scholarly field, internationalization remains undertheorized and underexplored in language education as an approach that can further support language educators to enhance their teaching practice. Drawing together an international cast of contributors and examples from a variety of contexts, this handbook will serve as an essential reference for researchers and graduate students in applied linguistics and related fields, language teachers and language teacher educators, support services professionals, program developers and curriculum designers.

Rajya Sabha, 2017-08 *Journal of Developmental Education*, 2017 **Jamaica Survey of Living Conditions**, 2013 *Interventions for the Control of Non-typhoidal Salmonella Spp. in Beef and Pork* Food and Agriculture Organization of the United Nations, 2016 Non typhoidal Salmonella spp are estimated to cause 93.8 million cases of acute gastroenteritis and 155 000 deaths globally each year, approximately 85% of which are estimated to be foodborne, establishing Salmonella as having a significant public health and economic impact on society. Pork products are among the top food borne sources of Salmonella globally, while beef products have been implicated in several large outbreaks in recent years. Contamination of beef and pork with Salmonella can also have a negative impact on the agri food and trade sectors due to costly recalls of products and by limiting market access. FAO and WHO have undertaken a systematic review of the available evidence on interventions to control Salmonella in beef and pork from primary production through processing. This information was then considered by an expert meeting which provided recommendations on efficacious interventions. This report presents the outcome of those deliberations as well as the review of studies on which the discussions were based, providing the reader with a wealth of up to date information on the currently available interventions for the control of Salmonella in beef and pork.
