

APEX ASB1 A/B or Y Switcher Box

The Facts about Signal Switching

A/B-Y switching works two ways. It lets you switch a common source signal (guitar, bass or keyboard) between two amplifiers or amp channels. Or conversely, it lets you switch two source signals (eg. two different guitars) into the same amplifier. A good quality A/B-Y switcher will also provide LEDs or other indicators to show whether A, B or Y routing is in effect. The Y routing combines both the A and B outputs in parallel so that two amplifiers can be driven at once.

About the APEX ASB1:

- The ASB1 provides full A/B-Y switching facilities, plus parallel Common input jacks.
- A and B LEDs illuminate to indicate selected signal routing. Both LEDs illuminated indicates Y routing.
- Dual footswitches permit selective A/B switching or combining both A&B as with a Y adaptor.
- Dual Common jacks permit connecting something in parallel with the input source - perhaps a guitar tuner.
- 9-volt battery is supplied
- Dimensions: 3.75 x 2.5 x 1.5 inches (90mm x 63mm x 40mm)
- Weight: 1lb (454g)

Usage

One instrument switching between two amplifiers

- Plug your instrument cable into one of the jacks marked Common. If you have a guitar tuner you may connect it to the other Common jack with an extra guitar cord or shielded patch cable.
- Using two more shielded cables connect the A jack to the input of amp A and the B jack to the input of amp B.
- Depress the A/B footswitch to select amplifiers. One of the two LEDs will illuminate to tell you which amp is selected.
- To get both amps working at once, depress the Y footswitch. When both amps are working, both LEDs will be on.

Two instruments being selected for one amplifier

- Using shielded guitar cords, plug one instrument into the A jack and the other into the B jack.
- Using a third shielded cable, connect one of the Common jacks to the input of the amplifier.
- Now depress the A/B footswitch to select the desired instrument. Please note that it is not generally advisable to use the Y function in this setup (i.e. to have both instruments going into the amp at once).
- The LEDs will indicate that instrument A or B is connected to the amplifier.
