

Performance Task Sample

Title: Types of Electric Circuit - Open and Closed Circuits

Objective: The objective of this performance task is to assess students' understanding of open and closed circuits through a hands-on project. Students will design and construct circuits that demonstrate their knowledge of the characteristics and differences between the two circuit types.

Instructions:

Research: Students are required to conduct thorough research on open and closed circuits. They should understand the concepts, components, and how each type functions.

Design: Based on their research, students will design circuit diagrams for both open and closed circuits. They need to plan the layout and connections of components. The students should also include a list of a step-by-step plan for the circuit construction.

Construction: Using the provided materials (wires, batteries, bulbs, switches, etc.), students will construct their electric circuits according to their experimental design. They should follow their proposed circuit design and ensure that the circuit is properly connected and that the components are functioning correctly.

Presentation: Students will design and construct circuits that demonstrate their knowledge of the characteristics, including the flow of electric current, behavior of circuit and differences between open and closed circuits.

Assessment Criteria:

Accuracy: The students should be able to identify and classify open and closed circuits. Precise arrangement of components, explanation of behavior and characteristics of each circuit. Including the correct demonstration of the flow of electric current in the circuits.

Creativity: Innovative and creative design in circuit construction which features the modifications that enhance the functionality and visual appeal of the circuit model.

Clarity of Presentation: The student should be able to explain, in their own words, the difference between open and closed circuits and their impact on the circuit's function.

Research and Understanding: To demonstrate their knowledge and understanding of electric circuit concepts, students should present their research and understanding. This includes showcasing their comprehension of open and closed circuits, electrical conductivity, and the role of different components. Their findings should reflect a deep understanding of these concepts and how they can be applied in real-life situations.

Formative Assessment in a Brain-Compatible Classroom Marcia L. Tate, 2024-05-21 Students learn in diverse ways and their grades may not always accurately reflect their true understanding. Marcia L. Tate explores the what, why, and how of assessment to help educators know whether their students are truly learning. Dive into Tate's insightful exploration of building student confidence and nurturing organic student retention and comprehension. Grades K-12 teachers will learn how to create a brain compatible classroom that fosters success and confidence in students when they are assessed. Plan lessons so students know what they should know and be able to do. Ask effective questions to find out if students are really learning what they should learn. Create effective tests. Be able to tell before, during, and after lessons what students know. Contents: Introduction, Chapter 1: What Are the Types of Assessment, Chapter 2: What Evidence Supports the Use of a Variety of Assessment Types, Chapter 3: How Can I Create a Brain-Compatible Classroom Environment That Fosters High Academic Achievement, Chapter 4: How Can I Begin With the End in Mind, Chapter 5: How Can I Write Quality Selected and Constructed Response Test Items, Chapter 6: How Can Effective Questioning Show That Students Are Learning, Chapter 7: How Do I Know What Students Already Know Before the Lesson, Chapter 8: How Do I Know What Students Are Learning During the Lesson, Chapter 9: How Do I Know What Students Have Learned After the Lesson, Chapter 10: How Can Checklists Be Used to Assess Student Learning, Chapter 11: How Can Rubrics Be Used to Assess Student Learning, Chapter 12: How Do We Know What Students Are Learning When They Work Together, Chapter 13: How Can Students Peer and Self Assess During the Formative Process, Chapter 14: How Can Students Knock the Top Off Any Test, Final Thoughts, References, Index.
