**ICAS2014-International Conference on Analytics Driven Solutions** Eduardo Rodriguez,Department of Leisure Studies Greg Richards,Greg Richards,2014-09-10 _10th European Conference on Games Based Learning_ , **Mastering Time - Innovative Solutions to Complex Scheduling Problems** Ali Soofastaei,2025-05-07 Time is one of our most valuable resources yet managing it effectively is often one of the toughest challenges Mastering Time Innovative Solutions to Complex Scheduling Problems is a comprehensive guide introducing new methods and solutions to solve complex scheduling problems in professional contexts By mastering these creative solutions you can gain control over your time This book presents practical strategies and tools to streamline workflows optimize resource allocation and tackle bottlenecks head on Whether you are managing multiple projects balancing competing priorities or simply seeking to organize your time better the insights provided in this book will help you unlock new levels of productivity and efficiency With real world examples cutting edge technologies like artificial intelligence and time tested techniques Mastering Time Innovative Solutions to Complex Scheduling Problems equips readers with the knowledge and tools to transform even the most challenging schedules into manageable efficient plans Dive into the future of scheduling where complexity is simplified and time is truly mastered **Behavioural Types** Simon Gay,António Ravara,2022-09-01 Behavioural type systems in programming languages support the specification and verification of properties of programs beyond the traditional use of type systems to describe data processing A major example of such a property is correctness of communication in concurrent and distributed systems motivated by the importance of structured communication in modern software Behavioural Types from Theory to Tools presents programming languages and software tools produced by members of COST Action IC1201 Behavioural Types for Reliable Large Scale Software Systems a European research network that was funded from October 2012 to October 2016 As a survey of the most recent developments in the application of behavioural type systems it is a valuable reference for researchers in the field as well as an introduction to the area for graduate students and software developers **Brain Storm Optimization Algorithms** Shi Cheng,Yuhui Shi,2019-06-03 Brain Storm Optimization BSO algorithms are a new kind of swarm intelligence method which is based on the collective behavior of human beings i e on the brainstorming process Since the introduction of BSO algorithms in 2011 many studies on them have been conducted They not only offer an optimization method but could also be viewed as a framework of optimization techniques The process employed in the algorithms could be simplified as a framework with two basic operations the converging operation and the diverging operation A good enough optimum could be obtained through recursive solution divergence and convergence The resulting optimization algorithm would naturally have the capability of both convergence and divergence This book is primarily intended for researchers engineers and graduate students with an interest in BSO algorithms and their applications The chapters cover various aspects of BSO algorithms and collectively provide broad insights into what these algorithms have to

offer The book is ideally suited as a graduate level textbook whereby students may be tasked with the study of the rich variants of BSO algorithms that involves a hands on implementation to demonstrate the utility and applicability of BSO algorithms in solving optimization problems     Information Systems Architecture and Technology: Proceedings of 36th International Conference on Information Systems Architecture and Technology – ISAT 2015 – Part I Leszek Borzemski,Adam Grzech,Paweł Swiątek,Zofia Wilimowska,2016-02-23 This four volume set of books constitutes the proceedings of the 36th International Conference Information Systems Architecture and Technology 2015 or ISAT 2015 for short held on September 20 22 2015 in Karpacz Poland The conference was organized by the Computer Science and Management Systems Departments Faculty of Computer Science and Management Wroclaw University of Technology Poland The papers included in the proceedings have been subject to a thorough review process by highly qualified peer reviewers The accepted papers have been grouped into four parts Part I addressing topics including but not limited to systems analysis and modeling methods for managing complex planning environment and insights from Big Data research projects Part II discoursing about topics including but not limited to Web systems computer networks distributed computing and multi agent systems and Internet of Things Part III discussing topics including but not limited to mobile and Service Oriented Architecture systems high performance computing cloud computing knowledge discovery data mining and knowledge based management Part IV dealing with topics including but not limited to finance logistics and market problems and artificial intelligence methods

**Digital Twins and Simulation Technology** Lavanya Sharma,Pradeep Kumar Garg,2025-07-04 This book provides a comprehensive overview of the concept of digital twins emphasising its strategic importance across various commercial domains This book covers the fundamentals data requirements tools and technologies essential for understanding and implementing digital twins It discusses how digital twins are used for running simulations analysing performance issues and generating potential improvements to optimise business processes The book explores the architecture historical background and real time applications in sectors including urban planning healthcare smart cities and manufacturing Explains digital twin technology including its core principles architecture and how it replicates physical objects in virtual platforms in detail Covers the data types and tools necessary for creating and maintaining digital twins including sensors data processing systems and integration methodologies Explores technologies such as Computer Vision IoT AI ML 5G AR and VR that drive the functionality and application of digital twins Analyses practical applications in diverse sectors like urban planning smart cities healthcare manufacturing operations and power generation equipment showcasing real world use cases and benefits Examines real time challenges and limitations associated with implementing digital twin technology providing a balanced view of its capabilities and constraints It is a reference book for researchers scholars and students who are working or interested in learning about digital twin technology     Mechatronic Systems and Materials VIII Zdzisław Gosiewski,Zbigniew Kulesza,2017-07-12 12th MSM Selected peer reviewed papers from the 12th International Conference
