Merging Instructional Design with Teaching and Learning Research 2nd Edition is the scholarly resource for online learning that faculty instructional designers and administrators have raved about. This book addresses course design, teaching and student motivation across the continuum of online teaching modes: remote, hybrid, hyflex, and fully online, integrating these with pedagogical and cognitive science and grounding its recommendations in the latest research. The book will help you design or redesign your courses to ensure strong course alignment and effective student learning in any of these teaching modes. Its emphasis on evidence-based practices makes this one of the most scholarly books of its kind on the market today. This new edition features significant new content including more active learning formats for small groups across the online teaching continuum, strategies and tools for scripting and recording effective micro lectures, ways to integrate quiz items within micro lectures, more conferencing software and techniques to add interactivity, and a guide for rapid transition from face to face to online teaching. You'll also find updated examples, references, and quotes to reflect more evolved technology. Adopt new pedagogical techniques designed specifically for remote, hybrid, hyflex, and fully online learning environments. Ensure strong course alignment and effective student learning for all these modes of instruction. Increase student retention, build necessary support structures and train faculty more effectively. Integrate research-based course design and cognitive psychology into graduate or undergraduate programs. Distance is no barrier to a great education. *Online Teaching at Its Best* provides practical, real-world advice grounded in educational and psychological science to help online instructors, instructional designers, and administrators deliver an exceptional learning experience even under emergency conditions.

Using Computers in Qualitative Research Nigel G. Fielding, Raymond M. Lee, 1991-04-30. This is a comprehensive assessment of recent developments in the use of computers in qualitative research, an increasingly important and rapidly growing area of interest among social scientists and graduate students. *Using Computers in Qualitative Research* profiles and compares the principal programs available, identifying their particular strengths and limitations. It outlines the sorts of research problems that existing and forthcoming software can and cannot handle. The contributors also draw on their experiences of teaching computer-based techniques to suggest ways in which these could be incorporated into research methods training. Database Design and Construction John Willitts, 1992. This text is a comprehensive, practically orientated textbook on the planning and design of relational databases through project conception to program design. In addition it contains a substantial section which describes the architecture of information retrieval systems. It takes as its focal points relational databases using programmable database systems such as Ingres or dBase, textual databases using information retrieval systems. Increasingly information professionals are designing and maintaining database applications. But frequently they have not been trained in the strategies, principles and techniques which underpin the design and construction of a robust database application. Using an open learning approach this book aims to assist the reader through numerous case studies as well as
