setting nursing process focus includes the latest NANDA diagnostic criteria therapeutic goals link assessment data to expected outcomes assessment parameters sharpen essential diagnostic skills rationale for interventions provides the how and why for specific actions New sections address guidelines for delivering culturally competent care and health promotion and early interventions for care givers outcomes focused care sets specific goals for nursing interventions multiplicity of care settings including home care and partial hospitalization discuss the growing trend away from full time hospital care transitions into the community reflect today s changing health care environment psychopharmacology content is fully updated to include the latest therapeutic agents and data Johnson's Psychiatric-mental Health Nursing Wanda K. Mohr,2003 This comprehensive revised text discusses psychiatric nursing through an adaptation and growth framework integrating the nursing process This edition emphasizes psychiatric mental health nursing more from in patient care to community based care Major disorders are addressed as well as treatments and psychiatric topics throughout the lifespan Other features include its visual and readable presentation and numerous pedagogical tools such as learning objectives and therapeutic dialogues New to this edition are clinical examples at the beginning of every disorder reflection and critical thinking questions nursing care plans historical capsule nursing practice implications key terms and more A Study Guide accompanies the text For more information visit <http://connection.lww.com/go/mohr> Clinical Applications of Nursing Diagnosis Helen C. Cox,1997 This text assists students in learning how to apply nursing diagnosis in a variety of clinical settings including adult child women s psychiatric gerontic and home health considerations This book thoroughly addresses the final phase of the nursing process evaluation and how to proceed through this phase Includes latest approved NANDA diagnoses through the 12th Conference References are alphabetized and grouped at the end of the book Alphabetical list of Nursing Diagnoses at end of text Entirely new section of interventions included for gerontology Related Clinical Concerns is a new section within each nursing diagnosis detailing the potential collaborative problems that may arise Utilizes the most commonly used organizational system for nursing diagnoses Gordon s Functional Health Patterns Interventions include associated scientific rationales Contains innovative double checking pedagogical tool titled Have you selected the correct diagnosis **Paperbound Books in Print** ,1983 **Critical Care Nursing** Patricia Goncze Morton,1998 This book is organized into five parts the first two of which cover areas applicable to all critical care patients including the patient s and family s experience education pain management ethical and legal issues and the rewards and challenges of critical care nursing The third part addresses specific populations including pediatric patients pregnant women older adults and postanesthesia patients as well as interfacility transport The balance of the book is arranged by body systems and concludes with multisystem problems This is the seventh edition of a text first published in 1973 and last published in 1994 The purpose is to present current comprehensive and practical information built on a holistic perspective of care in which the patient is the core of nursing practice This book meets a need for educating students and nurses in the critical care environment The

editors objective of providing a framework for focusing on patient responses in the critical care environment is met. This book is intended for students in critical care educators and clinicians. This edition is also tailored to meet the needs of patients. The editors are excellent authorities in critical care nursing. All three are practitioners and one is both practitioner and educator. The contributors and reviewers are critical care experts. The illustrations are used best to understand critical care technology. The graphics used for anatomy, physiology, and patient assessment add to the usefulness of the text. The references are pertinent and current but certain specialty content would need to be updated by the reader e.g. medication protocols for CHF. The use of color in the text is managed carefully to guide and not overpower the reader. The 1997 ACLS Guidelines are in Appendix 1. The Answer Key to Study Questions appears in Appendix 2. Anatomy and physiology, patient assessment, and clinical management, nursing research, collaborative plans of care, teaching, and home care issues are some of the innovations presented. One strength of the book is how it addresses the changes associated with aging and the needs of the older adult. Aging concerns are covered in one chapter and are highlighted throughout the text. This edition provides current information that makes the previous edition out of date. I would recommend this text for beginning critical care nurses and for undergraduate nursing students for its coverage of advanced pathophysiological concepts.
