Caution: Distributor timing is not adjustable on any engine. Distributors do not have built-in provision of smooth variable advance. Both ignition timing and timing advance are controlled by the Powertrain Control Module (PCM). Because a conventional timing light can not be used to adjust distributor position after installation, note position of distributor before removal.

- (1) Remove air cleaner assembly.
- (2) Disconnect negative cable from battery.
- (3) Remove distributor cap from distributor housing.

(4) Mark the position of distributor housing in relationship to engine or dash panel. This is done to aid in reinstallation.

(5) When distributor is removed, the number one cylinder must be brought to the Top Dead Center (TDC) position.

(6) Align a vertical line on the Crankshaft Vibration Damper with the 10 o'clock position.

(7) Align a vertical line, as viewed from front of engine, on the Crankshaft Vibration Damper to align with the 05 o'clock position (TDC mark on timing chain cover). (Fig. 12)

(8) The distributor cap should always be aligned to the CYL. NO. 1 cylinder mark (top mark) on the crankshaft position sensor. The CYL NO. 1 mark, rotate the distributor through another complete 360 degrees. Note the position of the number one cylinder spark plug cable for the cap in relation to rear. This should now be aligned to this position.

(9) Disconnect distributor position sensor wiring harness from main engine wiring harness.

- (9) Remove distributor holddown bolt and cap.
- (10) Remove distributor from engine by lifting straight up.
- (11) Note that rotor will rotate slightly in a clockwise direction while lifting up distributor. The oil pump gear will also rotate slightly in a counter-clockwise direction while lifting up distributor. This is due to the helical oil gears on distributor and camshaft.

(12) Note rotated position of rotor during distributor removal. During installation, this will be referred to as the Pre-position.

(13) Distribute oil to oil pump gear through hole in side of engine. It should be slightly below lower cylinder oil in 10 o'clock position (Fig. 12).

(14) Remove and discard the old distributor to engine block gasket.
