## MACROECONOMICS

### Section II

Planning Time—10 minutes

Writing Time—50 minutes

**Directions:** You have 10 minutes to read all of the questions in this booklet, to sketch graphs, to make notes, and to plan your answers. You will then have 50 minutes to answer all three of the following questions. It is suggested that you spend approximately half your time on the first question and divide the remaining time equally between the next two questions. In answering the questions, you should emphasize the line of reasoning that generated your results; it is not enough to list the results of your analysis. Include correctly labeled diagrams, if useful or required, in explaining your answers. A correctly labeled diagram must have all axes and curves clearly labeled and must show directional changes. Use a pen with black or dark blue ink.

1. Assume that the United States economy is operating at full employment.
  - (a) Using a correctly labeled graph of the long-run aggregate supply, short-run aggregate supply, and aggregate demand, show each of the following.
    - (i) Current price level, labeled  $PL_1$
    - (ii) Current output level, labeled  $Y_1$
  - (b) Assume that personal savings in the United States increase. Using a correctly labeled graph of the loanable funds market, show the impact of the increase in personal savings on the real interest rate.
  - (c) Based on the real interest rate change identified in part (b),
    - (i) will interest-sensitive expenditures increase, decrease, or remain unchanged?
    - (ii) what will happen to the rate of economic growth? Explain.
  - (d) Assume that the real interest rate of the euro zone increases relative to the real interest rate of the United States. Draw a correctly labeled graph of the foreign exchange market for the euro and show the impact of the change in the real interest rate in the euro zone on each of the following.
    - (i) Demand for the euro. Explain.
    - (ii) Value of the euro relative to the United States dollar
  - (e) Assume that the United States current account balance is zero. Based on the change in the value of the euro identified in part (d)(ii), will the United States current account balance now be in surplus, be in deficit, or remain at zero?

**Political Ecologies of COVID-19** Andrea J. Nightingale, Seema Arora-Jonsson, Nitin Devdas Rai, Juanita Sundberg, 2023-08-02 By March 2020 COVID 19 had affected nearly every community on earth either with infections or with mobility restrictions Significant peer reviewed research effort has gone into understanding the virus and its spread mainly from an epidemiological and medical perspective Political ecologists have been somewhat critical of such analyses because of their failure to understand the sociality of COVID 19 and its emergence They emphasise the need to look for how the virus has acted upon inclusions and exclusions and current cleavages in society despite the fact that it can potentially attack anyone anywhere Commentaries have therefore drawn attention to the more than human assemblages that allowed COVID 19 to infect humans global food chains and capitalism and social inequalities that underpin uneven exposure and access to health care In this Research Topic we seek papers that engage with political ecologies of COVID 19 We welcome articles that are based on empirical research in specific contexts attempting to understand the impacts of the viral outbreak as well as articles which lay out research agendas for political ecologies of COVID 19 What questions need to be asked What does it mean to take a socionatural and political ecological approach What can we learn from the state s response in different places How can such analyses add to the global conversation about the pandemic

shareholder protection in public limited companies Derivative actions have been a focal point of legislators agendas on shareholder protection in the past few decades throughout Europe and beyond Nevertheless there remain jurisdictions such as Greece which are still devoid of this remedy Against this backdrop this book examines whether and how the derivative action may improve shareholder protection constituting thus a mechanism that justifies legislative attention It does so in three parts First it analyses the desirable role derivative actions assume in protecting shareholder property monitoring corporate management and mitigating agency costs alongside their economic implications introducing the reader to the contemporary international debate on the topic Having set the desiderata the second part proceeds with the comparative analysis of Greek German and UK law jurisdictions that have recently reformed their provisions on shareholder protection examining not only the law on derivative actions and their Greek counterpart remedy but also mechanisms of shareholder protection that do or could assume functions similar to those of the derivative action By critically assessing the merits and failures of the respective UK German and Greek shareholder protection laws the book then proceeds to offer in Part III a model framework of shareholders derivative litigation for jurisdictions considering reform Written in an accessible format it will be an invaluable resource for anyone interested in this important aspect of company law and corporate governance
