**Deleuze and Guattari's Philosophy of 'Becoming-Revolutionary'** Raniel S.M. Reyes,2020-04-27 This book reconstructs Deleuze and Guattari's micropolitics toward a philosophy of becoming revolutionary. It provides novel ways to comprehend their political philosophy through a critical engagement with Chantal Mouffe's theorization of radical democracy. Michael Hardt and Negri's diagnosis of Empire, Franco Berardi's analysis of semiocapitalism, the Philippine Party List System Act and the ASEAN Integration Project to name a few. These initiatives aim to examine, expand and challenge Deleuze and Guattari's philosophy against the backdrop of various present day predicaments and practices that perpetually allow people to choose their own oppression. Furthermore, the book embarks on an invigorating journey through philosophy, politics, cultural studies and contemporary events searching for new modes of thinking and resistance that carry with them the radical potentials of a revolution to come. Through the philosophy of becoming revolutionary, the book endorses the cultivation of new concepts, subjectivities and relations capable of subverting advanced capitalism and other kinds of ethical fascism toward a people and world to come. Health Informatics Meets EHealth G. Schreier, E. Ammenwerth, A. Hörbst, 2016-05-12 Progress in medicine has traditionally relied heavily on classical research pathways involving randomized clinical trials (RCTs) to establish reliable evidence for any given therapeutic intervention. However, not only are RCTs lengthy and expensive, they have a number of other disadvantages including the fact that they are currently failing to keep pace with the number of potential innovative treatment options being developed, particularly in areas such as rare diseases. With the vast amount of data increasingly available for use in profiling patient characteristics and establishing correlations between outcomes and potential predictors, predictive modeling may offer a potential solution to the limitations of RCTs. This book presents the proceedings of the 2016 Health Informatics meets eHealth conference held in Vienna, Austria, in May 2016. The conference provides a platform for researchers, practitioners, decision makers, and vendors to discuss innovative health informatics and eHealth solutions with a view to improving the quality, efficacy, and efficiency of healthcare. The theme of the conference is Predictive Modeling in Healthcare. Covering subjects as diverse as fall detection in the elderly, diabetes, physiotherapy, and pediatric oncology, this book will be of interest to all those working in the field of e-healthcare and its delivery.

want to achieve the SDG target of ending all forms of malnutrition by 2030 they have clear pathways to follow There are many levers to pull and this report provides many examples of countries that have done so Tackling malnutrition effectively is also key to meeting many other SDG targets Good nutrition signals the realization of people s rights to food and health It reflects a narrowing of the inequalities in our world Without good nutrition human beings cannot achieve their full potential When people s nutrition status improves it helps break the intergenerational cycle of poverty generates broad based economic growth and leads to a host of benefits for individuals families communities and countries Good nutrition provides both a foundation for human development and the scaffolding needed to ensure it reaches its full potential Good nutrition in short is an essential driver of sustainable development **Yearbook of International Organizations 2014-2015,**

**How the Internet Became Commercial** Shane Greenstein,2017-09-26 In less than a decade the Internet went from being a series of loosely connected networks used by universities and the military to the powerful commercial engine it is today This book describes how many of the key innovations that made this possible came from entrepreneurs and iconoclasts who were outside the mainstream and how the commercialization of the Internet was by no means a foregone conclusion at its outset Shane Greenstein traces the evolution of the Internet from government ownership to privatization to the commercial Internet we know today This is a story of innovation from the edges Greenstein shows how mainstream service providers that had traditionally been leaders in the old market economy became threatened by innovations from industry outsiders who saw economic opportunities where others didn t and how these mainstream firms had no choice but to innovate themselves New models were tried some succeeded some failed Commercial markets turned innovations into valuable products and services as the Internet evolved in those markets New business processes had to be created from scratch as a network originally intended for research and military defense had to deal with network interconnectivity the needs of commercial users and a host of challenges with implementing innovative new services How the Internet Became Commercial demonstrates how without any central authority a unique and vibrant interplay between government and private industry transformed the Internet
