Rebuilding Crime Prevention Through Environmental Design Rachel Armitage, Paul Ekblom, 2019-02-11 Crime Prevention Through Environmental Design CPTED is a practice oriented approach to reduce the risk of offences such as burglary and fear of crime by modifying the built environment. In recent years this approach has been criticised for duplicating terminology and for failing to integrate successfully with other approaches. Rebuilding Crime Prevention Through Environmental Design explores and extends the common ground between CPTED and situational crime prevention another traditional approach in the field of crime prevention and security via the latter's evolution into the field of crime science. Drawing on international research to develop new interdisciplinary perspectives this volume explores how situational crime prevention and environmental criminological theories relate to those of Crime Prevention Through Environmental Design and considers how crime science can be reformulated to merge different approaches or at least articulate them better. Rebuilding Crime Prevention Through Environmental Design will appeal to students applied academic researchers and practitioners who wish to deepen their understanding and contribute in turn to the ongoing revitalisation of the field

Linne & Ringsrud's Clinical Laboratory Science E-Book Mary Louise Turgeon, 2018-12-22 Thoroughly updated and easy to follow Linne Ringsrud's Clinical Laboratory Science Concepts Procedures and Clinical Applications 8th Edition offers a fundamental overview of the laboratory skills and techniques you'll need for success in the clinical laboratory.
