Public Banks and Public Purpose Diana V. Barrowclough, Thomas Marois, 2026-01-22 This book examines the resurgence of public banks and their critical role in addressing global climate and development related challenges. Drawing from the lessons of the 2008-09 financial crisis, the implementation of the UN Sustainable Development Goals, and most crucially the COVID-19 pandemic, it provides a comprehensive analysis of how public banking institutions can effectively scale up and deliver climate aligned development finance at affordable rates and favourable terms. Through diverse case studies spanning national and multilateral public banks across both wealthy and developing regions, the volume employs multidisciplinary approaches and mixed methodologies to evaluate their capacity, mandate fulfilment, and accountability mechanisms. The research illuminates the complex power dynamics that determine who benefits from public banking initiatives and offers evidence based insights for strengthening these institutions' ability to serve the public interest in the face of climate challenges. This volume will appeal to a diverse readership including policymakers and government officials involved in development, financial regulation, and climate policy, academics, and researchers in economics, finance, political economy, business, and sustainable development.
