The Struggle for the Soul of Teacher Education Kenneth M. Zeichner,2017-10-10 The Struggle for the Soul of Teacher Education is a much needed exploration of the unprecedented current controversies and debates over teacher education and professionalism Set within the context of neo liberal education reforms across the globe the book explores how the current struggles over teaching and teacher education in the US came about as well as reflections on where we should head in the future Zeichner provides specific examples of work that moves teacher education toward greater congruency between ideals and practices while outlining the basis for a new form of community based teacher education where universities and other program providers local communities school districts and teacher unions share responsibility for the preparation of teachers Ultimately Zeichner problematizes an uncritical shift to more practice and clinical experience and discusses the enduring problems of clinical teacher education that need to be addressed for this shift to be educative Readers are sure to gain insight on transforming teacher education so it more adequately addresses the need to prepare teachers capable of providing a high quality education with access to a rich and broad curriculum and culturally and community responsive teaching for everyone's children

Breaking Ranks Colin Diver,2022-04-12 Some colleges will do anything to improve their national ranking That can be bad for their students and for higher education Since U S News World Report first published a college ranking in 1983 the rankings industry has become a self appointed judge declaring winners and losers among America's colleges and universities In this revealing account Colin Diver shows how popular rankings have induced college applicants to focus solely on pedigree and prestige while tempting educators to sacrifice academic integrity for short term competitive advantage By forcing colleges into standardized best college hierarchies he argues rankings have threatened the institutional diversity intellectual rigor and social mobility that is the genius of American higher education As a former university administrator who refused to play the game Diver leads his readers on an engaging journey through the mysteries of college rankings admissions financial aid spending policies and academic practices He explains how most dominant college rankings perpetuate views of higher

education as a purely consumer good susceptible to unidimensional measures of brand value and prestige. Many rankings he asserts also undermine the moral authority of higher education by encouraging various forms of distorted behavior misrepresentation and outright cheating by ranked institutions. The recent *Varsity Blues* admissions scandal for example happened in part because affluent parents wanted to get their children into elite schools by any means necessary. Explaining what is most useful and important in evaluating colleges Diver offers both college applicants and educators a guide to pursuing their highest academic goals freed from the siren song of the best college illusion. Ultimately he reveals how to break ranks with a rankings industry that misleads its consumers undermines academic values and perpetuates social inequality.

Place, Not Race Sheryll Cashin, 2014-05-06

From a nationally recognized expert a fresh and original argument for bettering affirmative action Race based affirmative action had been declining as a factor in university admissions even before the recent spate of related cases arrived at the Supreme Court. Since Ward Connerly kickstarted a state by state political mobilization against affirmative action in the mid 1990s the percentage of four year public colleges that consider racial or ethnic status in admissions has fallen from 60 percent to 35 percent. Only 45 percent of private colleges still explicitly consider race with elite schools more likely to do so although they too have retreated. For law professor and civil rights activist Sheryll Cashin this isn't entirely bad news because as she argues affirmative action as currently practiced does little to help disadvantaged people. The truly disadvantaged black and brown children trapped in high poverty environs are not getting the quality schooling they need in part because backlash and wedge politics undermine any possibility for common sense public policies. Using place instead of race in diversity programming she writes will better amend the structural disadvantages endured by many children of color while enhancing the possibility that we might one day move past the racial resentment that affirmative action engenders.

In Place Not Race Cashin reimagines affirmative action and champions place based policies arguing that college applicants who have thrived despite exposure to neighborhood or school poverty are deserving of special consideration. Those blessed to have come of age in poverty free havens are not. Sixty years since the historic decision we're undoubtedly far from meeting the promise of *Brown v Board of Education* but Cashin offers a new framework for true inclusion for the millions of children who live separate and unequal lives. Her proposals include making standardized tests optional replacing merit based financial aid with need based financial aid and recruiting high achieving students from overlooked places among other steps that encourage cross racial alliances and social mobility. A call for action toward the long overdue promise of equality *Place Not Race* persuasively shows how the social costs of racial preferences actually outweigh any of the marginal benefits when effective race neutral alternatives are available.

Marijuana Federalism Jonathan H. Adler, 2020-03-17

On marijuana there is no mutual federal state policy will this cause federalism to go up in smoke. More than one half the 50 states have legalized the use of marijuana at least for medical purposes and about a dozen of those states have gone further legalizing it for recreational use. Either step would have been

almost inconceivable just a couple decades ago. But marijuana remains an illegal controlled substance under a 1970 federal law so those who sell or grow it could still face federal prosecution. How can state and federal laws be in such conflict? And could federal law put the new state laws in jeopardy at some point? This book, an edited volume with contributions by highly regarded legal scholars and policy analysts, is the first detailed examination of these and other questions surrounding a highly unusual conflict between state and federal policies and laws. *Marijuana Federalism* surveys the constitutional issues that come into play with this conflict as well as the policy questions related to law enforcement at the federal versus state levels. It also describes specific areas such as banking regulations in which federal law has particularly far-reaching effects. Readers will gain a greater understanding of federalism in general, including how the division of authority between the federal and state governments operates in the context of policy and legal disputes between the two levels. This book also will help inform debates as other states consider whether to jump on the bandwagon of marijuana legalization.
