Education and Extremisms Farid Panjwani, Lynn Revell, Reza Gholami, Mike Diboll, 2017-08-09 Education and Extremisms addresses one of the most pressing questions facing societies today how is education to respond to the challenge of extremism It argues that the implementation of new teaching techniques curricular reforms or top down

changes to education policy alone cannot solve the problem of extremism in educational establishments across the world. Instead the authors of this thought provoking volume argue that there is a need for those concerned with radicalisation to reconsider the relationship between instrumentalist ideologies shaping education and the multiple forms of extremisms that exist. Beginning with a detailed discussion of the complicated and contested nature of different forms of extremism including extremism of both a religious and secular nature the authors show that common assumptions in contemporary discourses on education and extremism are problematic. Chapters in the book provide a careful selection of pertinent and topical case studies, policy analysis and insightful critique of extremist discourses. Taken together the chapters in the book make a powerful case for re-engaging with liberal education in order to foster values of individual and social enrichment, intellectual freedom, criticality, open mindedness, flexibility and reflection as antidotes to extremist ideologies. Recognising recent criticisms of liberalism and liberal education the authors argue for a new understanding of liberal education that is suitable for multicultural societies in a rapidly globalising world. This book is essential reading for academics, researchers and postgraduate students with an interest in religion, citizenship education, liberalism, secularism, counter terrorism, social policy, Muslim education, youth studies and extremism. It is also relevant to teacher educators, teachers and policymakers.

The Interplay Between Competition Law and Intellectual Property Gabriella Muscolo, Marina Tavassi, 2019-01-17. Although competition law and intellectual property are often interwoven until this book there has been little guidance on how they work together in practice. As the intersection between the two fields continues to grow worldwide both in case law and in regulation the book's markets based approach focusing on sectors such as pharmaceuticals, IT, telecoms, energy and agriculture in eleven of the world's most active jurisdictions provides a much needed in depth understanding of how this interplay reveals itself among the different legal systems. Written by a range of authors including judges, regulators, academics, economists and practitioners in both fields the book provides an international comparative perspective as well as detailed analysis of specific cases, policies and proposals for change. Among the issues and topics covered are the following: free movement of goods and the protection of intellectual property rights; standard essential patents; intellectual property rights between technological development and consumer protection; geo blocking; online platforms and antitrust; excessive prices. In this context special attention is paid throughout to the increasing dialogue among Competition Authorities and between Judges and Competition Authorities around the world. As matchless remedy for the lack of uniformity heretofore the book's investigation of the nexus between competition law and intellectual property in different sectors and in various countries takes a giant step towards a more balanced approach and more levelled regulation and practices. It will be warmly appreciated by policy makers, decision makers, regulators, practitioners and academics in both competition law and intellectual property fields.

Localizing Governance in India Bidyut Chakrabarty, 2017-02-17 Participatory governance has a long history in India and this book traces historical intellectual trajectories of participatory governance and how older Western discourses have influenced Indian policymakers While colonial rulers devolved power to accommodate dissenting voices for independent India participatory governance was a design for democratizing governance in its true sense Participation also acted as a vehicle for localizing governance The author draws on both Western and non Western theoretical treatises and the book seeks to conceptualize localizing governance also as a contextual response It also makes the argument that despite being located in different socio economic and political milieu thinkers converge to appreciate localizing governance as perhaps the only reliable means to democratize governance The book aims to confirm

this argument by reference to sets of evidence from the Indian experience of localizing governance By attempting a genealogy of participatory governance in the West and in India and an empirical study of participatory governance in India the book sheds light on the exchange of ideas and concepts through space and time thus adding to the growing body of literature in the social sciences on conceptual flow It will be of interest to political scientists and historians in particularly those studying South Asia **Current Index to Journals in Education** ,2000 **Bibliographic Guide to Conference**
