the English Curriculum to Life David Didau,2024-04-12 Bringing the English Curriculum to Life builds on David Didau's groundbreaking book *Making Meaning in English* by showing how the principles of the original book can be applied in schools and classrooms. Drawing together experiences of designing, teaching, supporting and assessing English across the schools within Ormiston Academies Trust OAT, this book demonstrates what an ambitious, coherently sequenced, broad and balanced English curriculum with successful adaption for students with SEND can look like in practice. Designed around the explicit teaching of the powerful conceptual knowledge students need to master the discipline, the book offers a fully resourced English curriculum packed with teaching suggestions and examples of high quality practice. Covering intent, implementation and assessment and outlining in detail what is included in each module for KS3 and 4, the curriculum can be adopted in its entirety but is also flexible enough for departments to take modules and slot them into their own curriculum. Providing an inspiring model for teaching English that enables all students to succeed, this is an essential resource for all English teachers and school leaders responsible for curriculum development. The Effective Induction of Newly Qualified Primary Teachers Sara Bubb, Peter Mortimore, 2000 This INSET handbook offers induction tutors, head teachers and LEA advisers practical and up to date guidance on the statutory programmes of support, monitoring and assessment for newly qualified teachers. [New Statesman](#), 2008 [Raising Achievement in Secondary Mathematics](#) Anne Watson, 2006-06 This book argues for changed attitudes towards low attaining students in secondary mathematics. Certain social groups regularly underachieve in mathematics so attainment is seen as an issue of social justice. The way that assessment, testing, teaching and grouping decisions in mathematics can confirm a cycle of low attainment is carefully described with well founded arguments based on many years experience and research. Anne Watson offers an alternative view of attainment and capability based on real classroom incidents in which low attaining students show themselves to be able to think about mathematics in quite sophisticated ways. She argues that teaching could be based on learners' proficiency rather than seen as correcting or confirming deficits in knowledge and behaviour. She describes how a group of teachers who believed that their students could do better with higher expectations developed a range of principles and strategies which supported their work. The students showed significant progress and the teachers felt they were doing a better job. This book is for anyone who is in a position to challenge existing practice in mathematics teaching, either in their own classroom or in the broader cultures of teaching. It offers the arguments, the knowledge and the support for changing practice in a non-judgemental, practical but well founded way. [SATs KS2 Year 6 Maths Reasoning Papers 3](#) A.
