 Research applied mathematical programming and graduated from Texas A M University in 1980 Right after his graduation he
 started teaching at Sharif University of Technology for thirty six years where he retired as an associate professor During this
 time he conducted research projects and taught several undergraduate and graduate courses mostly in mathematical
 programming such as Linear Programming Integer and Dynamic Programming Nonlinear Programming Sequencing and
 Scheduling and Quantitative Method in Managerial Decision Making Tari has published more than eighty papers in scientific
 journals and has held conference proceedings from the research results His hobbies include reading books and listening to
 classical music He also likes cooking Intermediate Mathematics II is the complement book to the first in the pair
 Mathematics I Both texts systematically describe concepts and tools that are crucial to every college student who are willing
 to attain solid base for more advance mathematical topics They aim to give the reader a comprehensive view of mathematics
 its use and its role in computation These two books cooperatively may be different than other mathematics textbooks Every
 chapter starts with a romantic poem Researchers have discovered that contemplating poetic imagery and the multiple layers
 of meanings in poems activates specific areas of the brain that help us to interpret our everyday reality In these books every
 topic is assisted by several examples After presentation of concepts and tools each chapter is proceeded with different real
 life applications of the topics Finally each chapter concludes with 60 multiple choice questions to attract deeper learning and
 understanding of the topics studied **Algebra Computer Item Generator Book 1998 Copyright ,1998 Algebra 1**
