Modern educational technology refers to the theory and practice of using modern educational theory and modern information technology to achieve teaching optimization through the design, development, utilization, management, and evaluation of teaching and learning processes and resources. Education and social science are the relationship between restriction and promotion. The relationship between education and social development is short because of the development of social productive forces, the progress of science and technology, and the content, methods, and organizational forms of ancient education cannot meet the needs of the emerging bourgeoisie.
