

## Step 3: Assembly

The peaks of the lower piece get inserted into one pocket of the piece above. In normal Assembly: the single peaks face outward:

In reverse assembly the single peaks face inward:

Glue the pieces of the first two rows together to ensure they form a stable base:

Place a small dot of glue inside each pocket of the second row modules:

Place a peak from row 1 inside each of the double pockets:

Join the last module on the second row to the first module in the first row to form a circle:

**Tip:** You do not have to glue every module after the first row, but you may periodically find that pieces don't want to stay attached, so feel free to glue whenever necessary, making sure the glue stays inside the double pockets.
