Entertainment Computing - ICEC 2017 Nagisa Munekata, Itsuki Kunita, Junichi Hoshino, 2017-08-23. This book constitutes the refereed proceedings of the 16th International Conference on Entertainment Computing ICEC 2017 held in Tsukuba City, Japan in September 2017. The 16 full papers, 13 short papers and 2 posters presented were carefully reviewed and selected from 46 submissions.

[Pop-Up Geometry](#) Joseph O'Rourke, 2022-03-24. Anyone browsing at the stationery store will see an incredible array of pop up cards available for any occasion. The workings of pop up cards and pop up books can be remarkably intricate. Behind such designs lies beautiful geometry involving the intersection of circles, cones and spheres, the movements of linkages and other constructions. The geometry can be modelled by algebraic equations whose solutions explain the dynamics. For example, several pop up motions rely on the intersection of three spheres, a computation made every second for GPS location. Connecting the motions of the card structures with the algebra and geometry reveals abstract mathematics performing tangible calculations. Beginning with the nephroid in the 19th century, the mathematics of pop up design is now at the frontiers of rigid origami and algorithmic computational complexity. All topics are accessible to those

familiar with high school mathematics no calculus required Explanations are supplemented by 140 figures and 20 animations
