## Introduction: What is a habitat?

A habitat is the living environment of a plant or animal. A habitat provides food, water shelter and place to raise their young. Plants and animals living in an environment are able to adapt and change in their habitat over time. Georgia has five areas where certain plants and animals have adapted to live. These habitat regions are mountains, piedmont, coastal plains, marsh/swamp and ocean. Many plants and animals can be found in these regions.

- Ocean
- Mountains
- Marsh & Swamp

## Mountains

The Blue Ridge Mountains are a part of the Appalachian Mountains that form the mountain habitat in north Georgia. The tallest mountain in Georgia is called Brasstown Bald. The Blue Ridge Mountains are named for their color--its peaks and ridges often appear covered in a soft blue haze. This mountain habitat is cool and windy. The soil at the higher elevations is rocky and there are fewer trees. The lower elevations have less rocks and richer soil. Tall trees grow thick forests of laurel, maple, and pine. Living in these forests are black bears, bobcats, white-tailed deer, foxes, raccoons, opossums, birds such as the warbler, nuthatch, and woodpecker. The mountains have one of Georgia's wettest areas. High areas get more than 80 inches of rain each year. Mountains have valleys, gorges, and waterfalls. Fresh, cool flowing rivers are home to salamanders, frogs, beavers, muskies and trout and animals that can survive colder weather and higher winds are found in the mountains.

## Piedmont

The Piedmont region has low rolling hills. Piedmont means "foot of the mountain." Forests, lakes, and rivers spread out on sloping hills from the mountains to the coastal area. It is located between the coastal plains and the mountains in the northern half of Georgia. The Piedmont has many of the same trees as the mountain region. The biggest difference between the Piedmont region and the mountain region is that the Piedmont has warmer temperatures because it is not as high as the mountains. The soil in the Piedmont contains red clay. This area has many lakes and slow-moving rivers and waterfalls. The Piedmont is home to white-tailed deer, squirrels, raccoons, opossums, beavers, river otters, and birds. The Piedmont is the most populated region in Georgia. This means many people live in the Piedmont. Many wild animals are found where people live because their habitats and trees are being cut down.
