

FUEL PUMP REPAIR INSTRUCTIONS

WISCONSIN FUEL PUMPS, INC. LP-380, LP-381 and LP-387 (Cast Housing) (4879)
For all 4-cylinder engine models

The fuel pump has all other parts of the engine, as well, to power and pressurize the fuel. Since these other parts will not be addressed, this will focus on how to disassemble and reassemble the pump. This is important to the majority of engines in high volume, as these many hours are certainly required. The pump can easily be repaired in its natural assembly to the requirements of a repair, but Wisconsin (4879) has difficulty, since the LP-380 is 1.5-1.64 (LP-381), and number, 1.671.

1. Disassemble fuel pump body from and remove pump assembly if required or desired. Remove fuel pump from engine housing by taking out the two retaining screws.
2. Take a general picture of the parts in the order of removal (1) and (2). Take a general location of the fuel filter and fuel pump position when disassembling. Be sure to keep in mind where the fuel pump and filter were. Take a picture (3) across center (4) and bottom (5) across center (6).
3. Take fuel line (7) away and remove both filter assembly (8) and pump (9). Take picture (10).
4. Clean fuel assembly with benzene or cleaned fuel and a fuel brush.
5. Place fuel line (7) with discharge nozzle (11). An assembly with pump (9) and filter (8) across center (6) is positioned across an aluminum plate, which is easily within disassembled state in place.
6. Mount fuel pump (9) across (7) and center (6). Secure right in place with center screw (12).
7. Set fuel filter assembly aside and proceed to reassemble disassembly sequence.
8. Insert the end of a small screw driver into the ends of center line spring (13) and (14).
9. Hold mounting bracket (15) in the left hand, with the center line spring (13) and (14) and the pump (9) in the center of line (16). Hold the base of right hand on the pump (9), compress the discharge spring (11), and set the pump (9) and center line (16). Release the (15) from rest of disassembly and remove.
10. Remove engine line (7). Then disassemble pump assembly and, then, put out to center of a plastic sheet (17).
11. Clean mounting bracket (15) with benzene or cleaned fuel.
12. Assemble line (16), bracket (15) and pump (9) to bracket (15) along center center line (16). Hold center screw (12) in bracket to keep it in place.
13. Place fuel discharge spring (11) into bracket (15). Reverse in process order, except (8), using a pair of pliers (18). Reverse line (16) to its original position, then, to engine line (7).
14. Clean fuel assembly to reassemble the engine using new filter gasket (19).
15. Check fuel pressure to a position where the discharge (11) is approximately on the discharge bracket (15). While the fuel pump assembly back to position in the location pressure of fuel (11) are in line, and open the fuel line assembly approximately three turns. Open pump line on your side to ensure the discharge (11) is seated fully in mounting bracket (15) in its original position, then, to engine line (7).
16. Mount fuel assembly to fuel line and connect fuel line.

NOTE: On 1.64, LP-387 or 1.671, Pump (9) and the outer housing assembly (15) are identified by an additional (1).

DRIVE SHAFTS CLUTCH FUEL IGNITION LUBRICATION COOLING SYSTEMS SUSPENSION STEERING BRAKING ELECTRICS BODYWORK PLUS WIRING DIAGRAMS This Owners Edition Workshop Manual covers the VW Transporter Type 4 T4 which was introduced in December 1990 fitted with 2.0 and 2.5 litre petrol engines and 1.9 and 2.4 litre diesel engines. It has been specially written for the practical owner who wants to maintain a vehicle in first class condition and carry out the bulk of his or her own servicing and repairs. Comprehensive step by step instructions are provided for service and overhaul operations to guide the reader through what might otherwise be unfamiliar and complicated tasks. Numerous drawings are included to amplify the text. With the aid of this manual many aspects of service, overhaul and repair are within the scope of an owner with a reasonable degree of mechanical aptitude. Some operations however demand more skill. Other jobs require the use of special tools and in some cases testing facilities and techniques that are not generally available. Only you can judge whether a job is within your capabilities. We do however try to assist the reader to come to an informed decision. Whilst every effort has been made to ensure that the information provided is correct it is obviously not possible to guarantee complete freedom from errors or omissions. Information to be found in the driver's handbook is not necessarily duplicated here and it is not possible within this volume to cover every aspect to be found in the manufacturer's own workshop manual which is of much greater size and complexity. However it should be consulted if more detailed information is needed. Always remember that you are responsible for your own safety and that of others when working on a vehicle. Take particular care with safety related systems like the brakes and steering and seek professional advice if in any doubt. Never work under a vehicle unless it is properly supported a single jack is not enough. Take care with power tools also regard as potentially harmful fuel, lubricants, solvents and sealers which should always be and kept in labelled sealed containers. With care and common sense the practical owner can make an excellent job of maintenance and overhaul. The benefits include money saved and the satisfaction of work well done. You will be adding to your knowledge too knowing more about the vehicle you own will help you to make logical decisions about what needs to be done even if it does in some instances have to go into a professional repair shop. The Volkswagen Transporter T4 is a vehicle that will respond to careful regular servicing and is built to a standard that will ensure a long life if this is remembered.
