**Market Design** Federico Echenique, Nicole Immorlica, Vijay V. Vazirani, 2023-06-22 The rich multi faceted and multi disciplinary field of matching based market design is an active and important one due to its highly successful applications with economic and sociological impact. Its home is economics but with intimate connections to algorithm design and operations research. With chapters contributed by over fifty top researchers from all three disciplines this volume is unique in its breadth and depth while still being a cohesive and unified picture of the field suitable for the uninitiated as well as the expert. It explains the dominant ideas from computer science and economics underlying the most important results on market design and introduces the main algorithmic questions and combinatorial structures. Methodologies and applications from both the pre Internet and post Internet eras are covered in detail. Key chapters discuss the basic notions of efficiency, fairness and incentives and the way market design seeks solutions guided by normative criteria borrowed from social choice theory.

**Multiple Criteria Decision Making** Günter Fandel, Tomas Gal, 2012-12-06 The organizers of the 12th International Conference on Multiple Criteria Decision Making MCDM held June 19-23, 1995 in Hagen received the second time the opportunity to prepare an international conference on MCDM in Germany. The first opportunity has been the 3rd International Conference on MCDM in Königswinter 1979. Quite a time ellapsed since then and therefore it might be interesting to compare some indicators of the development of the International Society on MCDM which has been founded in Königswinter. Stanley Zionts has been elected first president and all 44 participants of that Conference became founding members. Today our Society has over 1200 members and its own Journal MCDM World Scan. In Hagen 1996 we had 152 participants from 34 countries. It is interesting to mention that also other Groups established their organization like the European Working Group on Multiple Criteria Decision Aid, the German Working Group on Decision Theory and Applications, the Multi Objective Programming and Goal Programming Group ESIGMA and some others. It is also interesting to note that the intersection of members of all these Groups and Societies is not empty and there is quite a cooperation among them.
