**Our Journey Around the World** Francis Edward Clark, 1894      **Diary of a Journey Through Mongolia and Tibet in 1891 and 1892** William Woodville Rockhill, 1894      Exploratory Travels Through the Western Territories of North America Zebulon Montgomery Pike, 1889      **The American Catalogue**, 1891      *Global Warming and Earth's Evolution* Graham Winston, 2012-05-15

Global warming is a major phenomenon that is negatively affecting Earth. But what most people don't realize is that this effect is not limited within the planet's atmosphere; it may also affect Earth's journey through space. In *Global Warming and Earth's Evolution*, author Graham Winston reveals that the bigger picture is bigger than Global Warming and Global Warming is only the tip of the iceberg of Earth's own challenges. The book describes the real truths of Global Warming: it is mainly caused by man's unnecessary destruction of natural resources. Earth depends on being in a good condition to successfully complete its next evolution cycle. The book explains the importance of the cycles and what evolutionary changes occurred on Earth. Many previous unexplained phenomena could be linked to Earth's evolutionary cycles. The extinction of the dinosaur, the birth of the Grand Canyon, why has no large object recently collided with the Moon when millions of craters exist on the Moon, why has the impacts stopped and when will the impacts start happening again. These and other fascinating examples of unsolved phenomena will open the minds of many readers to this new dimension of thinking about what happened on Earth millions of years ago and whether Earth will survive the next evolutionary cycle. Global Warming has caused a negative effect on Earth's natural defense mechanism. Earth depends on surviving the severe challenges when close to the core of the Milky Way Galaxy. About the Author: Graham Winston's professional experience spans over 20 years and involves solving complex problems. To achieve success in these business fields, Winston solved many complex problems. The common skill applied across these fields was the development of innovative thinking. This later led to applying these same problem-solving techniques on Global Warming and Earth's evolution cycles to understand the relationship between Global Warming and Earth's own evolutionary journey as Earth travels across the Universe.

**IYA 2009 Final Report**,      The Journey Vinod Mahbubani, 2008. The author recounts the true story of his travels. His adventures begin in Boston and end some five months later along The Great Wall of China. The journey sees him take in several of the world's most important landmarks in around eighty towns and cities over a staggering 40,000 mile journey. That's quite some adventure. Whether it's the Niagara Falls in North America, the Rainforest in Australia, or Tropical Islands in Asia, there is something for everyone in this epic journey spanning four of the world's six continents. Across oceans, deserts, and distant lands, there is a story to tell, packed with adventure and experiences of a different kind. Come join me on this special journey and may it encourage you to explore and discover the world on a similar journey of your own. 5 star rating on Amazon. An entertaining read, substantially well-written, informative, and packed with invaluable traveller's tips. I thoroughly recommend it and what's more, I'll be looking out for Vinod's next book.
