The Cassini-Huygens Visit to Saturn Michael Meltzer, 2015-01-02 Cassini Huygens was the most ambitious and successful space journey ever launched to the outer Solar System This book examines all aspects of the journey its conception and planning the lengthy political processes needed to make it a reality the engineering and development required to build the spacecraft its 2.2 billion mile journey from Earth to the Ringed Planet and the amazing discoveries from the mission The author traces how the visions of a few brilliant scientists matured gained popularity and eventually became a reality Innovative technical leaps were necessary to assemble such a multifaceted spacecraft and reliably operate it while it orbited a planet so far from our own The Cassini Huygens spacecraft design evolved from other deep space efforts most notably the Galileo mission to Jupiter enabling the voluminous paradigm shifting scientific data collected by the spacecraft Some of these discoveries are absolute gems A small satellite that scientists once thought of as a dead piece of rock turned out to contain a warm underground sea that could conceivably harbor life And we now know that hiding under the mist of Saturn's largest moon Titan is a world with lakes fluvial channels and dunes hauntingly reminiscent of those on our own planet except that on Titan it's not water that fills those lakes but hydrocarbons These and other breakthroughs illustrate why the Cassini Huygens mission will be remembered as one of greatest voyages of discovery ever made

Verifying Greenhouse Gas Emissions National Research Council, Division on Earth and Life Studies, Board on Atmospheric Sciences and Climate, Committee on Methods for Estimating Greenhouse Gas Emissions, 2010-07-28 The world's nations are moving toward agreements that will bind us together in an effort to limit future greenhouse gas emissions With such agreements will come the need for all nations to make accurate estimates of greenhouse gas emissions and to monitor

changes over time In this context the present book focuses on the greenhouse gases that result from human activities have long lifetimes in the atmosphere and thus will change global climate for decades to millennia or more and are currently included in international agreements The book devotes considerably more space to CO₂ than to the other gases because CO₂ is the largest single contributor to global climate change and is thus the focus of many mitigation efforts Only data in the public domain were considered because public access and transparency are necessary to build trust in a climate treaty The book concludes that each country could estimate fossil fuel CO₂ emissions accurately enough to support monitoring of a climate treaty However current methods are not sufficiently accurate to check these self reported estimates against independent data or to estimate other greenhouse gas emissions Strategic investments would within 5 years improve reporting of emissions by countries and yield a useful capability for independent verification of greenhouse gas emissions reported by countries

5 Steps to a 5 AP Environmental Science, 2014-2015 Edition Linda Williams, 2013-07-09 Get ready for your AP exam with this straightforward and easy to follow study guide updated for all the latest exam changes 5 Steps to a 5 AP Environmental Science features an effective 5 step plan to guide your preparation program and help you build the skills knowledge and test taking confidence you need to succeed This fully revised edition covers the latest course syllabus and provides model tests that reflect the latest version of the exam Inside you will find 5 Step Plan to a Perfect 5 1 Set Up Your Study Program 2 Determine Your Test Readiness 3 Develop Strategies for Success 4 Develop the Knowledge You Need to Score High 5 Build Your Test Taking Confidence 2 complete practice AP Environmental Science exams 3 separate plans to fit your study style Review material updated and geared to the most recent tests Savvy information on how tests are constructed scored and used

Climate Change Science Compendium 2009 Catherine P. McMullen, Jason Ramsey Jabbour, 2009 This Climate Change Science Compendium presents some of the issues and ideas that have emerged since the close of research for consideration by the Intergovernmental Panel on Climate Change IPCC Fourth Assessment Report over three years ago Focusing on work that brings new insights to aspects of Earth System Science at various scales it discusses findings from the International Polar Year and from new technologies that enhance our abilities to see the Earth's Systems in new ways Evidence of unexpected rates of change in Arctic sea ice extent ocean acidification and species loss emphasizes the urgency needed to develop management strategies for addressing climate change
