Applying the Illuminating Hidden Harvests approach Food and Agriculture Organization of the United Nations, Duke University, WorldFish, 2024-01-23 This document has been adapted from the research protocol used to compile country case study data and to produce the results summarized in the 2023 report titled Illuminating Hidden Harvests The contributions of small scale fisheries to sustainable development hereafter IHH study FAO Duke University and ii is comprehensive yet straightforward and cost effective While originally designed to be conducted at the national level this approach can and should be modified as desired to fit different scales of study and to respond to the particular needs and priorities of individual researchers regions of interest As the name implies the approach was designed to compile existing data on small scale fisheries and not to collect it Rather this approach only reinforces the importance of collecting more detailed data specific to small scale fisheries for example as distinct from large scale fisheries aquaculture and recreational fisheries in order to help fill the knowledge gap on small scale fisheries contributions to sustainable development Given the vast diversity of small scale fisheries in different countries a standard definition of small scale fisheries is not prescribed here nor in the IHH study researchers should refer to the definitions used in each country context However to better characterize fisheries and the differences among them that often contribute to local definitions of small or large scale fisheries the IHH study and this approach used a fisheries activity characterization matrix This tool provides a characterization of the small scale fisheries subsector at the country level and allows researchers to assess the scale of small scale fishing activities in a more relational manner thus avoiding the imposition of fixed definitions *Intermediate Accounting* Donald E. Guzik,2020-10-13 Why does US health care have such high costs and poor outcomes Dr David S Guzik offers this critique of the American health care industry and argues that it could work more effectively by rebalancing care cost and access For decades the United States has been faced with a puzzling problem Despite spending much more money per capita on health care than any other developed nation its population suffers from notoriously poorer health In comparison with 10 other high income nations in fact the US has the lowest life expectancy at birth the highest rates of infant and neonatal mortality and the most inequitable access to physicians when adjusted for need In An Introduction to the US Health Care Industry Dr David S Guzik takes an in depth look at this troubling issue Bringing to bear his unique background as a physician economist former University of Rochester medical school dean and former president of the University of Florida Health System Dr Guzik shows that what we commonly refer to as the US health care system is actually an industry forged by a unique collection of self interested and disjointed stakeholders He argues that the assumptions underlying well functioning markets do not align with health care The resulting market imperfections combined with entrenched industry stakeholders have led to a significant imbalance of care cost and access Using a nontechnical framework Dr Guzik introduces readers to the economic principles behind the function and dysfunction of our health care industry He shows how the market based approach could be expected to remedy

these problems while detailing the realities of imperfections regulations and wealth inequality on those functions He also analyzes how this industry developed presenting the conceptual underpinnings of the health care industry while detailing its history and tracing the creation and entrenchment of the current federation of key stakeholders government insurance companies hospitals doctors employers and drug and device manufacturers In the final section of the book Dr Guzick looks to the future describing the prevention innovation and alternative financing models that could help to rebalance the priorities of care cost and access that Americans need An online supplement on COVID 19 is available as is a discussion guide for instructors To access this supplemental material please visit www.jhupbooks.press.jhu.edu *Consumer Reports 2002*
