The Immortal Life of Henrietta Lacks by Rebecca Skloot

Essay Question #3: Why do you think George Gey gave out so many HeLa cells for free?

In the early 1950s, the US was experiencing an ever accelerating rate of extensive scientific research. As researchers in the medical field began increasing their eagerness to learn more of the workings of disease and ascertain ways to prevent them, the need for experimental "guinea pigs" arose. Curiosity led scientists all across the country to try creating the first dependable immortal cell line for medical research. Introduction of the first immortal cells by the head of Hopkins tissue culture research George Gey using cancerous cells extracted from the unknowing African American patient Henrietta Lacks would instigate great controversy decades after their creation in 1951. However, prior to the involvement of Henrietta's family, Gey shipped He La cells for free to friends and colleagues with little concern. Due to the lack of an enforced law of informed consent, along with racial discrimination, Gey distributed the HeLa cells in large quantities.

It is evident that there was no emphasized importance in the informed consent procedure that a doctor would have to give to their patient prior to any medical examination. Despite the requirements for patients to sign a consent form, doctors specified little of what they would do to them. In fact, many doctors did whatever they wanted on some people based on their scientific needs. According to The Immortal Life of Henrietta Lacks by Rebecca Skloot, the consent form that Henrietta signed said, "I hereby give consent to the staff ... to perform any operation procedures ... that may deem necessary in the proper surgical care and treatment of _____" (Skloot 31). Although Henrietta signed the form, the "operation procedures" mentioned had to be necessary in the proper treatment of her cancerous cervix. Quite obviously, the removal of a portion of her cancerous cervical tissue for Gey's research purposes was not for the sake of Henrietta's health. In a sense, the consent form meant little for how the patient would be treated.
