Machining builds on the author's earlier book *Versatility of Waterjet Technology* and chronicles the evolution of waterjet machining from crude cutting to a high precision manufacturing process. Spanning five decades of innovation, it highlights the people, ideas, and milestones that shaped this versatile technology. At its core, the book honors Dr. John Olsen, whose pioneering work in high pressure waterjets laid the foundation for transformative advances. Several chapters explore his pivotal role, including the development of compact, affordable systems for precision and micro machining. The Pacific Northwest's leadership in high pressure hardware, intelligent control software, and abrasive waterjet systems is also featured prominently. In addition to technical breakthroughs, the book examines how marketing, education, and collaboration helped transform waterjets from niche equipment into essential global manufacturing tools. Blending historical insight, technical depth, and personal reflection, this is essential reading for engineers, educators, and anyone curious about the evolution of the manufacturing technology. Sato, 2019-01-10 This book reveals what happens to applications for post conviction review when those in England Wales and Northern Ireland who believe they are wrongfully convicted apply to the Criminal Cases Review Commission the only body that can refer a case back to the Court of Appeal once appellants opportunities for direct appeal are exhausted While the Court is obliged to hear all such referrals the Commission can only refer a case where it believes there is a real possibility that the Court will quash the conviction The first empirical study of all stages of decision making within the Commission this book starts from the premise that the test applied by the Commission the real possibility test is not inflexible Though created by statute and refined through case law it must be determined on a case by case basis drawing too on cultural and structural variables alongside fresh evidence gathered by the Commission Through in depth analysis of case files and interviews Hoyle and Sato scrutinize the Commissions operational practices its working rules and assumptions considering how these influence its understanding of the real possibility test Situating their rich empirical data within a framework of the Commissions social organizational and legal contexts this book demonstrates that in its open ended investigations there is considerable scope for discretion for thorough exploration of all possible avenues or for choosing a more superficial consideration of a case It emerges that while structured internal guidance drawing heavily on Court jurisprudence shapes decision making creating consistency in approach there remains some variability across cases over time that can be accounted for by the different professional backgrounds and personalities of Commission staff
